Architecture And Capitalism 1845 To The Present:

Architecture and Capitalism Peggy Deamer, 2013-07-18 *Architecture and Capitalism* tells a story of the relationship between the economy and architectural design. Eleven historians each discuss in brand new essays the time period they know best looking at cultural and economic issues which in light of current economic crises you will find have dealt with diverse but surprisingly familiar economic issues. Told through case studies the narrative begins in the mid nineteenth century and ends with 2011 with introductions by Editor Peggy Deamer to pull the main themes together so that you can see how other architects in different times and in different countries have dealt with similar economic conditions. By focussing on what previous architects experienced you have the opportunity to avoid repeating the past. With new essays by Pier Vittorio Aureli, Ellen Dunham Jones, Keller Easterling, Lauren Kogod, Robert Hewison, Joanna Merwood, Salisbury Robin, Schuldenfrei, Deborah Gans, Simon Sadler, Nathan Rich and Micahel Sorkin.

Architecture and Labor Peggy Deamer, 2020-04-07 Through a collection of 13 chapters Peggy Deamer examines the profession of architecture not as an abstraction but as an assemblage of architectural workers. What forces prevent architects from empowering ourselves to be more relevant and better rewarded? How can these forces be set aside by new narratives, new organizations and new methods of production? How can we sit at the decision making table to combat short term real estate interests for longer term social and ethical value? How can we pull architecture, its conceptualization, its pedagogy and its enactment into the 21st century without succumbing to its neoliberal paradigm? In addressing these controversial questions *Architecture and Labor* brings contemporary discourses on creative labor to architecture, a discipline devoid of labor consciousness. This book addresses how not just what architects produce and focuses not on the past but on the present. It is sympathetic to the particularly intimate way that architects approach their design work while contextualizing that work historically, institutionally, economically and ideologically. *Architecture and Labor* is sure to be a compelling read for pre professional students, academics and practitioners.

A History of Architecture and Trade Patrick Haughey, 2018-01-19 *A History of Architecture and Trade* draws together essays from an international roster of distinguished and emerging scholars to critically examine the important role architecture and urbanism played in the past five hundred years of global trading, moving away from a conventional Western narrative. The book uses an alternative holistic lens through which to view the development of architecture and trade, covering diverse topics such as the coercive urbanism of the Dutch East India Company, how slavery and capitalism shaped architecture and urbanization and the importance of Islamic trading in the history of global trade. Each chapter examines a key site in history using architecture, landscape and urban scale as evidence to show how trade has shaped them. It will appeal to scholars and researchers interested in areas such as world history, economic and trade history and architectural history.
