The Zoologist's Guide to the Galaxy Arik Kershenbaum, 2022-03-15 A wildly fun and scientifically sound exploration of what alien life must be like Scientists are confident that life exists elsewhere in the universe Yet rather than taking a realistic approach to what aliens might be like we imagine that life on other planets is the stuff of science fiction The time has come to abandon our fantasies of space invaders and movie monsters and place our expectations on solid scientific footing Using his own expert understanding of life on Earth and Darwin's theory of evolution which applies throughout the universe Cambridge zoologist Dr Arik Kershenbaum explains what alien life must be like how these creatures will move socialize and communicate Might there be an alien planet with supersonic animals A moon where creatures have a language composed of smells Will aliens scream with fear act honestly or have technology The Zoologist's Guide to the Galaxy answers these questions using the latest science to tell the story of how life really works on Earth and in space

The Equations of Life Charles S. Cockell, 2018-06-19 A groundbreaking argument for why alien life will evolve to be much like life here on Earth We are all familiar with the popular idea of strange alien life wildly different from life on earth inhabiting other planets Maybe it's made of silicon Maybe it has wheels Or maybe it doesn't In *The Equations of Life* biologist Charles S Cockell makes the forceful argument that the laws of physics narrowly constrain how life can evolve making evolution's outcomes predictable If we were to find on a distant planet something very much like a lady bug eating something like an aphid we shouldn't be surprised The forms of life are guided by a limited set of rules and as a result there is a narrow set of solutions to the challenges of existence A remarkable scientific contribution breathing new life into Darwin's theory of evolution *The Equations of Life* makes a radical argument about what life can and can't be
