

MANUAL FOCUS **vs.** AUTOFOCUS

Most photographers use autofocus more often than manual focus. The main reason is simply convenience; it's easier than focusing manually. Autofocus also tends to be faster, and, in many cases, it's also more accurate (such as tracking focus on a moving subject).

Still, manual focus stuck around for a reason. If your camera is having trouble focusing, such as in dark conditions, manual focus lets you override any issues, or make precise adjustments that the camera may have missed.
