Bloodrites of the Post-structuralists Anne Norton, 2002 First Published in 2003 Routledge is an imprint of Taylor Francis an informa company **Bloodrites of the Post-Structuralists** Anne Norton, 2013-04-15 How do you write history when it is no longer linear In *Bloodrites of the Post Structuralists* respected political theorist Anne Norton reminds us of the real interplay between words laws scriptures myths and texts and the world of flesh Drawing from sources as diverse as foundational myths from Sarah in the bible Marat in his death bath and thinkers like Hegel and Foucault Norton reinterprets the relationship between word and flesh and places it in historical context The French and English Revolutions as well as the period of anti colonialism and post colonialism are used to frame her discussion of word and body and their historical significance Blood Gil Anidjar, 2014-05-06 Blood in Gil Anidjar's argument maps the singular history of Christianity A category for historical analysis blood can be seen through its literal and metaphorical uses as determining sometimes even defining Western culture politics and social practices and their wide ranging incarnations in nationalism capitalism and law Engaging with a variety of sources Anidjar explores the presence and the absence the making and unmaking of blood in philosophy and medicine law and literature and economic and political thought from ancient Greece to medieval Spain from the Bible to Shakespeare and Melville The prevalence of blood in the social juridical and political organization of the modern West signals that we do not live in a secular age into which religion could return Flowing across multiple boundaries infusing them with violent precepts that we must address blood undoes the presumed oppositions between religion and politics economy and theology and kinship and race It demonstrates that what we think of as modern is in fact imbued with Christianity Christianity Blood fiercely argues must be reconsidered beyond the boundaries of religion alone **India's**

Forests, Real and Imagined Alan Johnson, 2022-12-29 As they seek to explore evolving and conflicting ideas of nationhood and modernity India's writers have often chosen forests as the dramatic setting for stories of national identity India's *Forests Real and Imagined* explores how these settings have been integral to India's sense of national consciousness Alan Johnson demonstrates that modern writers have drawn on older Indian literary traditions of the forest as a place of exile trial and danger to shape new ideas of India as a modern nation The book casts new light on a wide range of modern writers from Bankim Chandra Chattopadhyay widely regarded as the first Indian novelist to contemporary authors such as Amitav Ghosh Arundhati Roy and Salman Rushdie as well as local attitudes to nationhood and the environment across the country

Gendering Modern Jewish Thought Andrea Dara Cooper, 2021-11-02 The idea of brotherhood has been an important philosophical concept for understanding community equality and justice In *Gendering Modern Jewish Thought* Andrea Dara Cooper offers a gendered reading that challenges the key figures of the all male fraternity of twentieth century Jewish philosophy to open up to the feminine Cooper offers a feminist lens which when applied to thinkers such as Franz Rosenzweig and Emmanuel Levinas reveals new ways of illuminating questions of relational ethics embodiment politics and

positionality She shows that patriarchal kinship as models of erotic love brotherhood and paternity are not accidental in Jewish philosophy but serve as norms that have excluded women and non normative individuals Gendering Modern Jewish Thought suggests these fraternal models do real damage and must be brought to account in more broadly humanistic frameworks For Cooper a more responsible and ethical reading of Jewish philosophy comes forward when it is opened to the voices of mothers sisters and daughters

Learning Bodies Malou Juelskjaer, Thomas Moser, Theresa Schilhab, 2008-12-31 Is the body a mere container of learning processes Or can we in a productive way develop an approach to learning that includes learning as a bodily phenomenon The authors all work with the development or refinement of theories of learning bodies and in this anthology they present the state of the art to anybody with an interest in current scientific discussions about the interplay between body movement and learning A full understanding of learning in all its complexity requires that the body is taken into account regardless of whether we are dealing with the neurological foundations of learning processes skill acquisition mental health and illness aesthetics or the physical setting where the learning takes place Body movement and senses in short corporeality provide the necessary experiences for change and development in relation to life long learning This anthology presents a range of theoretical approaches to learning neuroscience psychiatry sociology psychology phenomenology and pedagogy By presenting this range of approaches the anthology raises a central question in the philosophy of science the need for incorporation of different approaches to achieve further insights The first section of the book The Learning Body concerns the learning process from a psychological neuroscience and phenomenological point of view In part two The Encultured Body gender and aesthetics will be analysed in relation to the body and the community of practice The third section The Educated Body sheds light on various aspects of the body in educational contexts and different body related conditions for learning The anthology is of particular interest to researchers and students of education development and psychology and to those interested in body and movement both biomedical and the relation to social science and the humanities
