Airline Business In The 21st Century:

The Airline Business in the Twenty-first Century Rigas Doganis,2001 This book will be useful for those working in the airline industry and for students

Airline Business in the 21st Century Rigas Doganis,2005-06-28 This book focuses on the major issues that will affect the airline industry in this new millennium It tells of an industry working on low margins and of cut throat competition resulting from open skies Among the issues discussed are the low cost airline the impact of electronic commerce the debate on global airline alliances privatizing state owned airlines the creation of a Trans Atlantic Common Aviation area Most importantly the book carefully analyzes the strategies that are needed for airlines to succeed in the twenty first century This is essential reading for anyone interested in aviation

The Airline Industry Alessandro Cento,2008-10-15 The debate on the future of the aviation sector and the viability of its traditional business practices is the core of this book The liberalization of the EU market in the 1990s has radically modified the competitive environment and the nature of airline competition Furthermore the new millennium began with terrorist attacks epidemics trade globalization and the rise of oil prices all of which combined to push the industry into a perfect storm Airline industry profitability has been an elusive goal for several decades and the recent events has only accentuated existing weaknesses The main concern of industry observers is whether the airline business model successful during the 1980s and 1990s is now sustainable in a market crowded by low cost carriers The airlines that will respond rapidly and determinedly to increase pressure to restructure consolidate and segment the industry will achieve competitive advantages In this context the present study aims to model the new conduct of the legacy carriers in a new liberalized European market in terms of network and pricing competition with low cost carriers and competitive reaction to the global economic crises

O'Connell,George Williams,2016-12-05 Airlines are buffeted by fluctuating political and economic landscapes ever changing competition technology developments globalization increasing deregulation and evolving customer requirements As a consequence all sectors of the air transport industry are in a constant state of flux The principle aim of this book is to review current trends in the airline industry and its related suppliers thereby providing an insight into the forces that are changing its dynamics The factors that are reshaping the structure of the industry are examined with a view to identifying the key issues whose impact will be critical in the future The book features two very distinct sections The first contains short contributions from industry executives at CEO VP level from airlines aircraft engine manufacturers safety and navigational provider organisations who have set out their take of where the airline industry is heading This commercial input sets the scene for the book and provides the bridge to the second section which is composed of 18 chapters written by distinguished academic authors Each chapter presents a valuable insight into a specific area of the air transport industry including airlines airports cargo deregulation the environment navigation strategy information technology security and tourism The shared objective of the authors is to describe and explain the core competencies that are determining the current shape of the industry and to examine the forces that will change its direction going forward The book is written in a management style and will appeal to all levels of personnel who work for airlines across the world It is also written for airport authorities aerospace manufacturers regulatory and government transportation agencies researchers and students of aviation management transport studies tourism and the wider air transport industry *21st Century Airlines* Nawal K. Taneja,2017-09-08 In 21st Century Airlines Connecting the Dots Nawal Taneja addresses the challenges and opportunities facing the airline industry as it tries to innovate and create products and services that are radically different by connecting the dots at four key levels recognizing the implications of global events improving cross functional collaboration within the organization working more closely with the travel chain and providing much higher engagements with connectors within the social networks The book synthesizes insights gained from the experience of non traditional businesses such as Uber that have no physical assets and that focus on scalability through platforms as well as traditional businesses such as Mercedes Benz that are transitioning from operators of physical assets to adapt to the on demand and sharing economies These

insights show pragmatically that digitizing airline businesses would require digital mind sets digital technologies digital strategies and digital workplaces to explore new frontiers in value for both customers and airlines Moreover forward thinking airlines need to consider working with bimodal organizational structures in which one group optimizes current business models network fleet and schedule planning as well as revenue management while a second group explores innovative ways to add digital features to physical products to provide a consistent experience throughout the journey The book is written for all senior level practitioners of airlines and related businesses worldwide as well as senior level government policymakers

Airline Management Paul Stephen Dempsey, Laurence E. Gesell, 2006 **Applying the 'No Frills' concept to other specific Airline Businesses** Sven Brueninghaus, 2004-04-05 Master's Thesis from the year 2004 in the subject Business economics Business Management Corporate Governance grade 1.7 A University of Applied Sciences Essen IOM Frankfurt language English abstract The No Frills Airline concept is not a phenomenon of the last couple of years in the Airline industry even if the recent development of these carriers in Europe might lead to this conclusion The first Airline operating under the No Frills concept started in the beginning of the 1970ies in the USA and it took quite a while until this concept was followed by Airlines in Europe South America and Asia Pacific There were a lot of No Frills Airlines coming and going again in the last 33 years To start an Airline and define it as a No Frills carrier seems to be not enough to be successful in the market for a lot of years Only a very restricted number of these Airlines were successful and profitable for years The question is why What are the reasons why some No Frills Airlines are surviving and others do not This is one of the questions which will be answered in this paper The low cost and low price strategy which is the basis for the No Frills concept in the Airline Industry is a business concept which was described by Porter as one of the basic strategies a company can follow This strategy was followed by a lot of companies in other industries like ALDI IKEA and Toyota These companies followed successfully the cost leadership strategy but adopted also other strategic goals to their business concept like quality and corporate culture items The cost leadership strategy is nothing new but how can it be reached and maintained in the Airline industry What are the prerequisites and the required activities to be successful in this industry with this concept In this paper answers to these questions will be given
