Michals, 1988

Conversations with Contemporary Photographers Nan Richardson, 2005 *Conversations* is a landmark series in photography featuring extensive interviews by major international critics with living masters on aesthetics, craft, and culture. The book traces the heritage of the medium in fascinating informal discourses on topics ranging from the personal to the political, covering intimate detail and theoretical background alike. Paratextual Issues in Duane Michals' Photography Leigh Erin Engel, 2007 *Encyclopedia of Twentieth-Century Photography, 3-Volume Set* Lynne Warren, 2005-11-15 The *Encyclopedia of Twentieth Century Photography* explores the vast international scope of twentieth-century photography and explains that history with a wide-ranging interdisciplinary manner. This unique approach covers the aesthetic history of photography as an evolving art and documentary form while also recognizing it as a developing technology and cultural force. This *Encyclopedia* presents the important developments, movements, photographers, photographic institutions, and theoretical aspects of the field, along with information about equipment, techniques, and practical applications of photography. To bring this history alive for the reader, the set is illustrated in black and white throughout, and each volume contains a color plate section. A useful glossary of terms is also included.

The Focal Encyclopedia of Photography Michael R. Peres, 2013-05-29 This volume is a complete revision of the 1996 third edition, sharing the ever-changing breadth of photographic topics with a special emphasis on digital imaging and contemporary issues. Produced by an international team of photographic and imaging experts with collaboration from the George Eastman House, the world's oldest photography museum, this fourth edition contains essays and photographic reproductions sharing information where photography and imaging serve a primary role, ranging from the atomic to the cosmic. **Thinking with Images** John M. Carvalho, 2018-08-06 This book advances an enactivist theory of aesthetics through the study of inscrutable artworks that challenge us to think because we do not know what to think about them. John M. Carvalho presents detailed analyses of four artworks that share this unique characteristic: Francis Bacon's *Study After Velázquez's Portrait of Pope Innocent X* (1953), the photographs of Duane Michals based on a retrospective of his work *Storyteller* at the Carnegie Museum of Art (2014), *tant donn's* (1968) by Marcel Duchamp, and Jean-Luc Godard's 1963 film *Le Mpris*, released in the United States as *Contempt*. Carvalho argues against the application of theory to derive appreciation or meaning from these artistic works. Rather, each study enacts an embodied cognitive engagement with the specific artworks intended to demonstrate the value of thinking about artworks that might be extended to our engagement with the world in

general This thinking happens as these studies show when we trust our embodied skills and their guide to what artworks and the world around us afford for the activation and refinement of those skills Thinking with Images will be of interest to scholars working in the philosophy of art and philosophical aesthetics as well as art historians concerned with the meaning and value of contemporary art *The Concise Focal Encyclopedia of Photography* Michael Peres, 2014-06-20 Defining photography is impossible Revealing it is another matter and that's what *The Concise Focal Encyclopedia of Photography* does with each turn of the page History The technical origins and evolution of photography are half of the story The other half consists of the ways that cultural forces have transformed photography into a constellation of practices more diverse than any other mode of representation Photographers can tell a more in depth story through a photo like Dorothea Lange's *Migrant Mother* than a journalist ever could with the written word alone Major themes and practitioners Over 25 entries many with supporting illustrations examine the figures trends and ideas that have contributed most heavily to the history and current state of photography Contemporary issues The issues influencing photography today are more complex than at any other time in its history Questions of ethics desire perception digitization and commercialization all vie for attention Hear what the experts have to say about crucial issues such as whether or not the images we take today will last the test of time and if so how When material is covered this skillfully concise is no compromise *The Concise Focal Encyclopedia of Photography* is packed with useful information compelling ideas and best of all pure pleasure *Disappearing Witness* Gretchen Garner, 2003-07-25 In documenting this transformation in American photography *Disappearing Witness* forcefully rethinks the history of photography itself
