# OpenSSH 8.9p1
#
# This is the system-wide configuration file for the OpenSSH
# daemon.  It is placed in the system-wide configuration directory
# and should be kept secure, as its contents can reveal information
# about the system and its users.  It is recommended that this
# file be owned by root and not world-readable.
#
# The configuration data is grouped into five sections: global
# configuration, host configuration, subsystem configuration,
# match configuration, and user configuration.  The global
# configuration section contains the most important options,
# including the listening port, the daemon's name, and the
# location of the private key files.  The host configuration
# section contains options for the various hosts that the daemon
# can connect to.  The subsystem configuration section contains
# options for the various subsystems that the daemon can use.
# The match configuration section contains options for the
# daemon to match against.  The user configuration section
# contains options for the daemon to match against.
#
