Archaeological Theory Norman Yoffee, Andrew Sherratt, 1993-07-22 This volume assesses the real achievements of archaeology in increasing an understanding of the past Without rejecting the insights either of traditional or more recent approaches it considers the issues raised in current claims and controversies about what is appropriate theory for archaeology The first section looks at the process of theory building

and at the sources of the ideas employed The following studies examine questions such as the interplay between expectation and evidence in ideas of human origins social role and material practice in the formation of the archaeological record and how the rise of states should be conceptualised further papers cover issues of ethnoarchaeology visual symbols and conflicting claims to ownership of the past The conclusion is that archaeologists need to be equally wary of naive positivism in the guise of scientific procedure and of speculation about the unrecorded intentions of prehistoric actors

Archaeological Theory Today Ian Hodder, 2014-02-27 Now in a revised and updated second edition this volume provides an authoritative account of the current status of archaeological theory as presented by some of its major exponents and innovators over recent decades It summarizes the latest developments in the field and looks to its future exploring some of the cutting edge ideas at the forefront of the discipline The volume captures the diversity of contemporary archaeological theory Some authors argue for an approach close to the natural sciences others for an engagement with cultural debate about representation of the past Some minimize the relevance of culture to societal change while others see it as central some focus on the contingent and the local others on long term evolution While few practitioners in theoretical archaeology would today argue for a unified disciplinary approach the authors in this volume increasingly see links and convergences between their perspectives The volume also reflects archaeology's new openness to external influences as well as the desire to contribute to wider debates The contributors examine ways in which archaeological evidence contributes to theories of evolutionary psychology as well as to the social sciences in general where theories of social relationships agency landscape and identity are informed by the long term perspective of archaeology The new edition of *Archaeological Theory Today* will continue to be essential reading for students and scholars in archaeology and in the social sciences more generally

Global Archaeological Theory Pedro Paulo Funari, Andrés Zarankin, Emily Stovel, 2006-04-07 Archaeological theory has gone through a great upheaval in the last 50 years from the processual theory which wanted to make archaeology more scientific to post processual theory which understands that interpreting human behavior even of past cultures is a subjective study This subjective approach incorporates a plurality of readings thereby implying that different interpretations are always possible allowing us to modify and change our ideas under the light of new information and or interpretive frameworks In this way interpretations form a continuous flow of transformation and change and thus archaeologists do not uncover a real past but rather construct a historical past or a narrative of the past Post processual theory also incorporates a conscious and explicit political interest on the past of the scholar and the subject This includes fields and topics such as gender issues ethnicity class landscapes and consumption This reflects a conscious attempt to also decentralize the discipline from an imperialist point of view to an empowering one Method and theory also means being politically aware and engaged to incorporate diverse critical approaches to improve understanding of the past and the present This book focuses on the fundamental theoretical issues found in the discipline and thus both engages and represents the very rich plurality of the

post processual approach to archaeology The book is divided into four sections Issues in Archaeological Theory Archaeological Theory and Method in Action Space and Power in Material Culture and Images as Material Discourse

Contradictions of Archaeological Theory Sandra Wallace, 2012-01-30 Is current archaeological theory stuck at an impasse Sandra Wallace argues that archaeological theory has become mired as a result of logical and ontological contradictions By showing that these contradictions are a result of common underlying philosophical assumptions and fallacies this book is able to show how a fresh approach to this discipline is necessary to resolve them even if this requires re examining some of the tenants of orthodox archaeology This fresh approach is achieved by using Critical Realism as an under labourer to philosophically evaluate archaeological theory Starting by assessing the historical impact of philosophy on the discipline and then looking at the current relationship between archaeology and the ontology of the material this book facilitates the construction of discipline specific theory by archaeologists The result is an approach to archaeology that allows both students and practitioners to free themselves from endemic contradictions and re discover their approach to archaeological theory

Archaeological Theory in Europe Ian Hodder, 2014-10-30 The 1980s witnessed exciting developments in theoretical writing in Western archaeology Where previous decades were dominated by the Anglo American perspective or New Archaeology the recent years showed the European debate grow in confidence and vitality This book published in 1991 captures this spirit of debate as contributors from a wide cross section of countries evaluate the development of the distinctly national and European characteristics of archaeology and assess future directions Contributors consider an extensive range of ideologies and viewpoints stressing the fundamentally historical emphasis and social construction of European archaeology The development of archaeological theory is traced with specific emphasis on factors which differ from country to country Ultimately it argues that the most active response to archaeology is to celebrate theory within a constantly critical mode A great insight into the development of theory

Reader in Archaeological Theory David S. Whitley, 1998 This Reader in Archaeological Theory presents sixteen articles of key theoretical significance in a format which makes this notoriously complex area easier for students to understand This volume provides an intellectual history of different approaches to archaeology which contextualizes the complex traditions of cognitive archaeology and postprocessualism on which it focuses organizes theories of archaeology the meanings of things the prehistoric mind and cognition gender ideology and social theory and archaeology s relationship to today s society and politics includes lucid section introductions to each section which provide context explain why the papers are so significant and summarize their key points emphasizes research from the New World making archaeological theory especially relevant and accessible to students in North America

Archaeological Theory and Scientific Practice Andrew Jones, 2001-12-06 Is archaeology an art or a science This question has been hotly debated over the last few decades with the rise of archaeological science At the same time archaeologists have seen a change in the intellectual character of their discipline as many writers have adopted approaches

influenced by social theory The discipline now encompasses both archaeological scientists and archaeological theorists and discussion regarding the status of archaeology remains polarised In this 2001 book Andrew Jones argues that we need to analyse the practice of archaeology Through an analysis of archaeological practice influenced by recent developments in the field of science studies and with the aid of extensive case studies he develops a new framework which allows the interpretative and methodological components of the discipline to work in tandem His reassessment of the status and character of archaeology will be of interest to students scholars and professionals Archaeological Theory in the New Millennium Oliver J. T. Harris, Craig Cipolla, 2017-06-26 Archaeological Theory in the New Millennium provides an account of the changing world of archaeological theory and a challenge to more traditional narratives of archaeological thought It charts the emergence of the new emphasis on relations as well as engaging with other current theoretical trends and the thinkers archaeologists regularly employ Bringing together different strands of global archaeological theory and placing them in dialogue the book explores the similarities and differences between different contemporary trends in theory while also highlighting potential strengths and weaknesses of different approaches Written in a way to maximise its accessibility in direct contrast to many of the sources on which it draws Archaeological Theory in the New Millennium is an essential guide to cutting edge theory for students and for professionals wishing to reacquaint themselves with this field
