Archaeology Anxiety Materiality Anxiousness Worry:

The Archaeology of Anxiety Jeffrey Fleisher, Neil Norman, 2015-12-17 Recent efforts to engage more explicitly with the interpretation of emotions in archaeology have sought new approaches and terminology to encourage archaeologists to take emotions seriously This is part of a growing awareness of the importance of senses what we see smell hear and feel in the constitution and reconstitution of past social and cultural lives Yet research on emotion in archaeology remains limited despite the fact that such states underpin many studies of socio cultural transformation The Archaeology of Anxiety draws together papers that examine the local complexities of anxiety as well as the variable stimuli class or factional struggle warfare community construction and maintenance personal turmoil and responsibilities to and relationships with the dead that may generate emotional responses of fear anxiousness worry and concern The goal of this timely volume is to present fresh research that addresses the material dimension of rites and performances related to the mitigation and negotiation of anxiety as well as the role of material culture and landscapes in constituting and even creating periods or episodes of anxiety

The Contemporary Archaeology of Emotions: Re-Framing the Past and Present Tuuli Matila, 2025-09-30 This SpringerBrief examines emotions in the past through contemporary archaeological materials The author explores this topic using the context of a former working class neighbourhood in northern Finland that existed during the Cold War era 1947 1987 Finland offers an interesting context to examine this because of the twofold emotional frames the Cold War and capitalism versus the nascent welfare state The push and pull between the values emphasizing universal care and compassion against the hardline militarisation and financial competition results in accessing different and sometimes contradictory emotions It also affords a gendered view into the past and such an angle could be attempted in the context of the deep past as well This book offers several examples on how emotions could be accessed in the deep past and draws parallels between the examples from a contemporary western country and various archaeological cultures and contexts Emotions can be a bridge to access the secrets of human behavior Such bridging is the core strength of archaeological education but rarely are emotions acknowledged in the process Lastly this book underlines the role of emotions specifically empathy in archaeological education and in destabilizing contemporary political notions on social norms and contracts

T. Harris,Craig Cipolla,2017-06-26 Archaeological Theory in the New Millennium provides an account of the changing world of archaeological theory and a challenge to more traditional narratives of archaeological thought It charts the emergence of the new emphasis on relations as well as engaging with other current theoretical trends and the thinkers archaeologists regularly employ Bringing together different strands of global archaeological theory and placing them in dialogue the book explores the similarities and differences between different contemporary trends in theory while also highlighting potential strengths and weaknesses of different approaches Written in a way to maximise its accessibility in direct contrast to many of the sources on which it draws Archaeological Theory in the New Millennium is an essential guide to cutting edge theory for students and for professionals wishing to reacquaint themselves with this field **The Routledge Handbook of Gender Archaeology** Marianne Moen,Unn Pedersen,2024-12-02 This volume presents a comprehensive overview of gender archaeology both theory and practice and contributes a substantial and definitive reference work by bringing together state of the art research theoretical overviews and the latest debates in the field Responding to the shifts in the theoretical landscape and the societal and political frameworks within which we produce our knowledge chapters create both a solid theoretical baseline which help readers grasp the significance of gender in archaeology as well as offer perspectives on how to engender produced knowledge about the past In line with recent focus on the shortcomings of gender and archaeological representation chapters also detangle academic discourse and popular representations in order to present novel ways of successfully negotiating the pitfalls of gendered ideas about past behaviours By encouraging novel ways of integrating theoretical perspectives with scrutiny of gender stereotypes original empirical examinations of identity markers and behaviours and re examinations of static representations of identities through new lenses such as intersectional perspectives personhood and materiality debates the volume is theoretically rich and will simultaneously provide a necessary benchmark

for future archaeological discourses Finally it will incorporate perspectives from researchers with diverse backgrounds and viewpoints to provide a truly comprehensive overview It will not shy away from engaging with politically contentious issues surrounding knowledge production but will include perspectives from researchers whose focus is less on feminist critiques and more on gender and identities Thus the volume bridges the two most prominent directions currently discernible within the focus area namely feminist re examinations on the one hand and research focused more on bodily practice and gendered experiences on the other The Routledge Handbook of Gender Archaeology is an invaluable resource for students and researchers in gender archaeology as well as gender studies more widely

Archaeologies of the Heart Kisha Supernant, Jane Eva Baxter, Natasha Lyons, Sonya Atalay, 2020-02-13 Archaeological practice is currently shifting in response to feminist indigenous activist community based and anarchic critiques of how archaeology is practiced and how science is used to interpret the past lives of people Inspired by the calls for a different way of doing archaeology this volume presents a case here for a heart centered archaeological practice Heart centered practice emerged in care based disciplines such as nursing and various forms of therapy as a way to recognize the importance of caring for those on whom we work and as an avenue to explore how our interactions with others impacts our own emotions and heart Archaeologists are disciplined to separate mind and heart a division which harkens back to the origins of western thought The dualism between the mental and the physical is fundamental to the concept that humans can objectively study the world without being immersed in it Scientific approaches to understanding the world assume there is an objective world to be studied and that humans must remove themselves from that world in order to find the truth An archaeology of the heart rejects this dualism rather we see mind body heart and spirit as inextricable An archaeology of the heart provides a new space for thinking through an integrated responsible and grounded archaeology where there is care for the living and the dead acknowledges the need to build responsible relationships with communities and with the archaeological record and emphasize the role of rigor in how work and research is conducted The contributions bring together archaeological practitioners from across the globe in different contexts to explore how heart centered practice can impact archaeological theory methodology and research throughout the discipline
