Implementing Successful Building Information Modeling Erika Epstein,2012 Building Information Modeling BIM is the process of generating and managing building data during a building s lifecycle Today more and more architectural firms have

adopted BIM software and processes because it allows them to produce measurably more work of better quality in shorter periods of time Featuring case studies of firms of all sizes this practical resource shows professionals how to implement BIM in the building industry around the globe The book explains how BIM allows the data collected to plan design and build projects to continue to be used and added to during the occupied life of the building Readers also become knowledgeable about the changing role of architects within the building industry as they embed BIM in their workflow From interoperability and open standards knowledge sharing and gathering data to the BIM software suite implementation planning and project workflow this authoritative volume provides a thorough understanding of key aspects of BIM that practitioners need to understand

Eco-Architecture VIII S. Hernández,P. Chias,2020-11-18 New opportunities for solving the challenges of contemporary architecture occur as a result of advances in the design and new building technologies as well as the development of new materials Many of the changes are motivated by a drive towards eco architecture trying to harmonise architectural products with nature Another important issue is the adaptation of the architectural design to the natural environment learning from nature and traditional construction techniques Contemporary architecture is at the threshold of a new stage of evolution deeply influenced by the advances in information and computer systems and the development of new materials and products as well as construction processes that will drastically change the industry Never before in history have architects and engineers had such a range of new processes and products open to them In spite of that the construction industry lags behind all others in taking advantage of a wide variety of new technologies This is understandable due to the inherent complexity and uniqueness of each architectural project Advances in computer and information systems including robotics offers the possibility of developing new architectural forms construction products and building technologies which are just now starting to emerge Changes have also taken place in the way modern society works and lives due to the impact of modern technologies Patterns of work have been disrupted and changed affecting transportation and the home environment The demand is for a new type of habitat that can respond to the changes and the consequent requirements in terms of the urban environment This volume originates from the 8th International Conference on Harmonisation between Architecture and Nature and deals with topics such as building technologies design by passive systems design with nature cultural sensitivity life cycle assessment resources and rehabilitation and many others including case studies from around the world
