Archives of the Insensible Allen Feldman, 2015-12-08 In *Archives of the Insensible* anthropologist Allen Feldman presents a genealogical critique of the sensibilities and insensibilities of contemporary warfare Feldman subjects the law to a strip search interrogating diverse trials and revealing the intersecting forms of bodily and psychic subjugation that they display Throughout ethnographic specificities are treated philosophically and political philosophy is treated ethnographically through deconstructive description Among the cases he examines are the interrogation of Ashraf Salim at the Combatant Status Review Tribunal at Guantanamo the kangaroo court of American soldiers who murdered Gul Mudin an Afghani noncombatant Gerhard Richter's forensic paintings of the disputable suicides of a Red Brigade cell in Stammheim prison Radovan Karadzic's forensic allegations against the corpses attributed to his shelling of a market in Sarajevo the trial of the police officers who beat Rodney G King and the latter's judicial lynching by video montage Jean Luc Godard's film class at Sarajevo where visual facts are indicted for no longer speaking for themselves and Jacques Derrida standing naked before his cat while awaiting apocalyptic judgment Through his analysis of these and several other cases Feldman shows how state power arises ex nihilo in the chasm between violent events themselves and the space where political meaning is made He aims to reverse sovereign logic the whole task of which is to transform what Foucault called the enigmatic dispersion of human events into certified facts on which state violence is grounded In contrast Feldman relies on the disorientation that arises from micrological description as theory in an attempt to retard the hyperaccelerated time of war and media

Administering Interpretation Peter Goodrich, Michel Rosenfeld, 2019-05-21 Populism in politics and policy orientations in law have thrown the jurisdiction of the academy and the disciplines of interpretation into disarray Critique flounders in abstraction and negativity law loses itself in particularity *Administering Interpretation* brings together philosophers humanists and jurists from both continental and Anglophone

War and Algorithm Max Liljefors, Gregor Noll, Daniel Steuer, 2019-10-11 New military technologies are animated by fantasies of perfect knowledge lawfulness and vision that contrast sharply with the very real limits of human understanding law and vision Thus various kinds of violent acts are proliferating while their precise nature remains unclear Especially man machine ensembles guided by algorithms are operating in ways that challenge conceptual understanding War and Algorithm looks at the increasing power of algorithms in these emerging forms of warfare from the perspectives of critical theory philosophy legal studies and visual studies The contributions in this volume grapple with the challenges posed by algorithmic warfare and trace the roots of new forms of war in the technological practices and forms of representation of the digital age Together these contributions provide a first step toward understanding and resisting our emerging world of war

Routledge International Handbook of Visual Research Methods in Anthropology Rupert Cox, Chris Wright, 2025-03-31 Routledge International Handbook of Visual Research Methods in Anthropology approaches the question of method through conceptualisations of the visual world as light sight images and technologies of imaging that can be analysed and described through a range of visual practices in the course of anthropological research The aim of the book is to move beyond making a case for the importance of the visual via its notional arrangement as a subject and means of study in anthropology by showing how it is applied as a way of doing anthropological research through the explication of a series of examples Employing an innovative structure for a handbook each contribution is orientated around a single distinguishing concept and together the contributions addresses the following three issues How to see through images by treating the visual as a form of knowledge made visible A second group of entries is concerned with how to see through time by approaching the visual as a modality for representing duration and rendering legible what may no longer be available to vision Finally a third group of entries deals with the visual at a phenomenal level as a medium that we see in This handbook is a timely and useful resource for both students and researchers of anthropology at this time because the discipline's long standing theoretical and empirically rich practical engagements with visual methods provide valuable insights for the social sciences into current transmutations of the visual into the multimodal the non representational and the sensory The importance of these areas as well as of digital research more generally makes visual

methods ever more important for social scientists hence this handbook is also valuable for those studying general research methods courses and in related fields such as sociology health studies and social work

Building Socialism Christina Schwenkel, 2020-09-21 Following a decade of U S bombing campaigns that obliterated northern Vietnam East Germany helped Vietnam rebuild in an act of socialist solidarity In Building Socialism Christina Schwenkel examines the utopian visions of an expert group of Vietnamese and East German urban planners who sought to transform the devastated industrial town of Vinh into a model socialist city Drawing on archival and ethnographic research in Vietnam and Germany with architects engineers construction workers and tenants in Vinh s mass housing complex Schwenkel explores the material and affective dimensions of urban possibility and the quick fall of Vinh s new built environment into unplanned obsolescence She analyzes the tensions between aspirational infrastructure and postwar uncertainty to show how design models and practices that circulated between the socialist North and the decolonizing South underwent significant modification to accommodate alternative cultural logics and ideas about urban futurity By documenting the building of Vietnam s first planned city and its aftermath of decay and repurposing Schwenkel argues that underlying the ambivalent and often unpredictable responses to modernist architectural forms were anxieties about modernity and the future of socialism itself
