Nationhood, Providence, and Witness Carys Moseley,2013-05-10 This book argues that problems with recognizing the State of Israel lie at the heart of approaches to nationhood and unease over nationalism in modern Protestant theology as well as modern social theory Three interrelated themes are explored The first is the connection between a theologian s attitude to recognizing Israel and their approach to the providential place of nations in the divine economy Following from this the argument is made that theologians handling of both modern and ancient Israel is mirrored profoundly in the question of recognition and ethical treatment of the nations to which they belong along with neighboring nations The third theme is how social theory represented by certain key figures has handled the same issues Four major theologians are discussed Reinhold Niebuhr Rowan Williams John Milbank and Karl Barth Alongside them are placed social theorists and scholars of religion and nationalism including Mark Juergensmeyer Philip Jenkins Anthony Smith and Adrian Hastings In the process debates over the relationship between theology and social theory are reconfigured in concrete terms around the challenge of recognition of the State of Israel as well as stateless nations

The Original Zodiac Graham Phillips,2025-10-28 Explores ancient Mesopotamian astrology which originated with those who created G bekli Tepe and details the system s eighteen zodiac signs Shares the author s decades long research to decipher the meanings and characteristics behind each of the original eighteen signs Shows how the original zodiac can enrich and expand our understanding of astrology personal relationships and our sense of self and destiny Today the zodiac is divided into twelve signs through which the sun appears to travel in a year A person s sign can influence their personality physical characteristics and fate However in ancient Mesopotamia the first

zodiac was divided into eighteen signs different from the Western and Vedic systems in use today The Original Zodiac reveals for the first time in more than 4 000 years this earliest known system of astrology The original Mesopotamian zodiac offered very different birth signs including the Serpent Swan Crane Horse Wolf and Eagle This zodiac was recorded on a clay tablet that is now housed in the British Museum cataloged as BM 86378 but there is no written record of how these signs were interpreted Now after decades of intensive research Graham Phillips reveals the meanings of these mysterious signs and their relevance for our times To determine what traits might be shared by those born in each sign of the original zodiac Phillips comprehensively surveyed hundreds of volunteers from diverse backgrounds He measured each participant s likes dislikes hobbies habits employment health information and other pertinent aspects of their lives and identities Not intended to replace or challenge our traditional understanding of astrology his findings offer an original system to enrich our current knowledge of the personality character and destiny of those born in each of its enigmatic signs **Evangeline Adams'**

Astronomy and History Selected Essays O. Neugebauer,2013-11-11 The collection of papers assembled here on a variety of topics in ancient and medieval astronomy was originally suggested by Noel Swerdlow of the University of Chicago He was also instrumental in making a selection which would in general be on the same level as my book The Exact Sciences in Antiquity It may also provide a general background for my more technical History of Ancient Mathematical Astronomy and

for my edition of Astronomical Cuneiform Texts Several of these republished articles were written because I wanted to put to rest well entrenched historical myths which could not withstand close scrutiny of the sources Examples are the supposed astronomical origin of the Egyptian calendar see 9 the discovery of precession by the Babylonians 16 and the simplification of the Ptolemaic system in Copernicus *De Revolutionibus* 40 In all of my work I have striven to present as accurately as I could what the original sources reveal which is often very different from the received view Thus in 32 discussion of the technical terminology illuminates the meaning of an ancient passage which has been frequently misused to support modern theories about ancient heliocentrism in 33 an almost isolated instance reveals how Greek world maps really looked and in 43 the Alexandrian Easter computus held in awe by many historians is shown from Ethiopic sources to be based on very simple procedures
