exploitation and processes of underdevelopment This is summarised as a regime of unfree labour mobility Combined with structural and historical approaches this book is based on ethnographic research It incorporates those who are left behind those who decide to stay migrants who fail and those who are on the move alongside clustered migrant communities in Senegal Mauritania and Spain The book s panoramic approach shows how West African step wise journeys to Europe by land and sea sees competing territorial and economic policies regulating an unstable and unpredictable trajectory creating illegal labour through dual logics of border security and selective labour mobility This book demonstrates that the diverse channels through which people migrate in the modern era are mediated by European states and labour markets which utilise border regimes to control labour and be globally competitive The themes and patterns that emerge in their context of inter generational change present a challenge to the accepted wisdom about the individual and household dynamics of labour migration This book is of interest to students and scholars of migration transnationalism politics security development economics and sociology
