Val McDermid cleverly and intelligently told *The Girl from Venice* is a truly riveting tale of love, mystery, and rampant danger. I loved it. Kate Furnivall, author of *The Liberation Smith*, not only constructs gritty realistic plots; he also has a gift for characterisation of which most thriller writers can only dream. *Mail on Sunday*: Smith was among the first of a new generation of writers who made thrillers literary. *Guardian*: Brilliantly worked, marvellously written, an imaginative triumph. *Sunday Times*: Martin Cruz Smith's Renko novels are superb. William Ryan, author of *The Constant Soldier* **Crucible** Nancy Kress, 2005-06-13 Nancy Kress made her reputation in the early 90s with her multiple award-winning novella *Beggars in Spain*, which became the basis for her extremely successful *Beggars Trilogy* comprising *Beggars in Spain*, *Beggars and Choosers*, and *Beggars Ride*. Since then she has written over a dozen novels, including the well-received *Probability Trilogy* culminating in *Probability Space*, which garnered her the John W. Campbell Memorial Award for Best SF Novel. Now comes a brand new science fiction epic. It began with *Crossfire*, a far future novel of planetary colonization and alien first contact. Jake Holman, a man trying to escape a dark past, brought together a diverse group of thousands to settle on a new world. But instead, the humans found themselves caught in the crossfire of a galaxy-spanning war between two disparate species: aggressive militaristic humanoids known as Furs and passive plantlike creatures known as Vines. Having cast their lots with the peaceful Vines, humanity faces all-out war against the technologically superior Furs. Our only hope: A virus designed by the Vines to remove all aggressiveness from the Furs. Can it spread fast enough to save not only Holman's colony but the rest of humanity? And at what price to the Furs? Driven by strong ideas and deep moral questions and peopled with real-as-life characters, *Crucible* shows Kress at the top of her form, amply demonstrating why she has been one of science fiction's finest authors of the past twenty years. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied. Discarded Mark A. Ciccone, 2021-06-10 In 2023, the Accelerated Regeneration Compound (ARC) was created: a serum that stimulates regrowth of human tissue and which quickly drew notice from the United States government. In 2035, Project Golem was created: five genetically augmented super soldiers imbued with ARC. Twenty years later, the world is finally beginning to recover from the effects of the Turmoil: a near-apocalyptic collision of terrorist attacks, brushfire wars, economic collapse, industrial accidents, and internal disorder and uprisings across the globe. Here and there, rumors circulate of giants in black who fought against the worst violence and then suddenly disappeared, hidden or dead. Cut off from the Project, a small group of surviving Golems has spent the past five years in hiding. In that time, they have been seeking out others of their kind, trying to bring them together in a community all their own. They know nothing of their lives before the Project, if those even existed. Now, however, two of them are setting out on a journey to find answers. But the truth of their origins goes far deeper than they could ever believe. And there are some in the covert world they left behind who will kill to keep this truth buried. #5 *Shades of Gray: Night of the Twilight- The Chimera Strain* Kristie Lynn Higgins, 2014-08-16 The *Shades Of Gray* Series follows the adventures of Kat, a woman with no memory of her past who is
