It is important to sit in a normal, upright position and let the backrest sit fully against your back. The top of the head restraint should be at eye level (or higher). Put your feet in a comfortable position in the footrest.

Wear the seat belt correctly

Make sure that the shoulder section of the belt is positioned over the centre of the shoulder, and move the lap section as far down over the hips as possible. The belts should always be worn so that they fit tightly (see illustration).

Filling the tank

Releasing the tank flap
