August 2012 Living Environment Key

David Thorpe

August 2012 Living Environment Key:

Chinese Environmental Governance Bingqiang Ren, 2013-12-05 In this edited volume leading environmental policy experts from China USA and Europe provide a contemporary view of Chinese environmental policy analyzing current discussions among various actors and agencies The book covers a wide range of topics including the gap between national policy goals and their local implementation cultural and social factors shaping political behavior legal and political systems affecting environmental policy creation and execution new societal forces participating in environmental policymaking and governance and local state strategies tasked with navigating a mix of political legal and societal forces Featuring in depth empirically grounded analyses with interdisciplinary approaches the book is ideal reading for scholars interested in the complex nature of balancing Chinese environmental sustainability and economic growth Towers, Turbines and Transmission Lines Sandy Bond, Sally Sims, Peter Dent, 2013-02-20 From the Foreword by Dr Valmond Ghyoot Emeritus Professor of Real Estate University of South Africa The valuation profession the legal profession property industry participants in general and students will welcome publication of this book Investors environmental groups and affected property owners will find essential information for use in their decision making development objections and claims My hope is that it will provide answers where required and that it will help to improve the professional standard of valuations and appraisals internationally I trust that it will also raise the standard of testimony in damages cases If so the editors and contributors will have succeeded in documenting the state of the art in this relatively unexplored terrain As a reference source this book will help quantify the negative impacts on property values of high voltage overhead transmission lines cell phone towers and wind turbines It gives a modern perspective of the concerns property owners have about the siting of industrial structures used to transmit or generate various forms of energy and how these concerns impact on property values Studies reveal concerns the public have about devices and structures that emit electromagnetic fields EMFs due to their potential health hazards Despite some research reports suggesting there are no potential adverse health hazards from high voltage overhead transmission lines HVOTLs and towers there is still on going concern about the siting of these structures due to fears of health risks from exposure to EMFs changes in neighbourhood aesthetics and loss in property values The siting of wind turbines is also receiving community opposition due to noise light flicker aesthetic concerns and loss in property values The extent to which such attitudes are reflected in lower property values is not well understood Towers Turbines and Transmission Lines Impacts on Property Value outlines results of studies conducted in the US the UK Australia and New Zealand and offers guidance to valuers as well as to property real estate appraisal students and property owners around the world The book provides defensible tools that are becoming widely accepted to assess the effect that these environmental detriments have on property prices *Wildlife Conservation on Farmland: Conflict in the countryside* David Whyte Macdonald, Ruth Feber, 2015 Many of the encounters between farming and wildlife especially vertebrates involve some

level of conflict which can cause disadvantage to both the wildlife and the people involved Through a series of WildCRU case studies this volume investigates the sources of the problems and ultimately of the threats to conservation discussing a variety of remedies and mitigations and demonstrating the benefits of evidence based inter disciplinary policy **Novel**

Ecosystems Richard J. Hobbs, Eric S. Higgs, Carol Hall, 2013-01-07 Land conversion climate change and species invasions are contributing to the widespread emergence of novel ecosystems which demand a shift in how we think about traditional approaches to conservation restoration and environmental management They are novel because they exist without historical precedents and are self sustaining Traditional approaches emphasizing native species and historical continuity are challenged by novel ecosystems that deliver critical ecosystem services or are simply immune to practical restorative efforts Some fear that by raising the issue of novel ecosystems we are simply paving the way for a more laissez faire attitude to conservation and restoration Regardless of the range of views and perceptions about novel ecosystems their existence is becoming ever more obvious and prevalent in today's rapidly changing world In this first comprehensive volume to look at the ecological social cultural ethical and policy dimensions of novel ecosystems the authors argue these altered systems are overdue for careful analysis and that we need to figure out how to intervene in them responsibly This book brings together researchers from a range of disciplines together with practitioners and policy makers to explore the questions surrounding novel ecosystems It includes chapters on key concepts and methodologies for deciding when and how to intervene in systems as well as a rich collection of case studies and perspective pieces It will be a valuable resource for researchers managers and policy makers interested in the question of how humanity manages and restores ecosystems in a rapidly changing world A companion website with additional resources is available at www.wiley.com/go/hobbs/ecosystems **The Biology of Urban**

Environments Philip James (Professor of ecology), 2018 Provides a novel perspective on urban ecosystems summarising our current understanding of the basic and applied aspects of these important and complex habitats whilst focusing on environmental concerns in the context of global change **The 'One Planet' Life** David Thorpe, 2014-11-13 The One Planet Life demonstrates a path for everyone towards a way of life in which we don't act as if we had more than one planet Earth The difference between this approach and others is that it uses ecological footprint analysis to help to determine how effective our efforts are Much of the book is a manual with examples on how to live the good life and supply over 65% of your livelihood from your land with mostly positive impacts upon the environment It examines the pioneering Welsh policy One Planet Development then considers efforts towards one planet living in urban areas After a foreword by BioRegional One Planet Living co founder Pooran Desai and an introduction by former Welsh environment minister Jane Davidson the book contains An essay arguing that our attitude to planning land and development needs to change to enable truly sustainable development Guidelines on finding land finance and creating a personal plan for one planet living Detailed guides on sustainable building supplying your own food generating renewable energy reducing carbon emissions from travel land

management water supply and waste treatment 20 exemplary examples at all scales from micro businesses to suburbs followed by Jane Davidson's Afterword The book will interest anyone seeking to find out how a sustainable lifestyle can be achieved It is also key reading for rural and built environment practitioners and policy makers keen to support low impact initiatives and for students studying aspects of planning geography governance sustainability and renewable energy

Moon Florida Keys Laura Martone, 2014-03-04 World traveler Laura Martone shares the best ways to experience the Florida Keys from diving the fascinating underwater coral reefs and shipwrecks of Key Largo to hiking and camping in the less touristy Middle Keys Martone offers unique trip ideas for a variety of travelers including Historic Architecture Underwater Journey and Romantic Key West Getaway Complete with information on taking trolley tours swimming with dolphins and attending festivals like the Key Largo Pirates Fest Moon Florida Keys gives travelers the tools they need to create a more personal and memorable experience Coverage includes Miami and the Everglades Key Largo Islamorada Marathon and the Middle Keys Big Pine and the Lower Keys Key West *Environmental Security* Rita Floyd, Richard Matthew, 2013-01-04 Economic development population growth and poor resource management have combined to alter the planet's natural environment in dramatic and alarming ways For over twenty years considerable research and debate have focused on clarifying or disputing linkages between various forms of environmental change and various understandings of security At one extreme lie sceptics who contend that the linkages are weak or even non-existent they are simply attempts to harness the resources of the security arena to an environmental agenda At the other extreme lie those who believe that these linkages may be the most important drivers of security in the 21st century indeed the very future of humankind may be at stake This book brings together contributions from a range of disciplines to present a critical and comprehensive overview of the research and debate linking environmental factors to security It provides a framework for representing and understanding key areas of intellectual convergence and disagreement clarifying achievements of the research as well as identifying its weaknesses and gaps Part I explores the various ways environmental change and security have been linked and provides principal critiques of this linkage Part II explores the linkage through analysis of key issue areas such as climate change energy water food population and development Finally the book concludes with a discussion of the value of this subfield of security studies and with some ideas about the questions it might profitably address in the future This volume is the first to provide a comprehensive overview of the field With contributions from around the world it combines established and emerging scholars to offer a platform for the next wave of research and policy activity It is invaluable for both students and practitioners interested in international relations environment studies and human geography **Eco-design of Buildings and Infrastructure** Bruno Peuportier, Fabien Leurent, Jean Roger-Estrade, 2016-11-03 The Chair on Ecodesign for buildings and infrastructures was created by ParisTech in partnership with VINCI with the aim of developing evaluation and simulation tools that integrate all ecodesign aspects e.g. greenhouse gas emissions impact on biodiversity depletion of

resources etc and provide genuine decision aid instruments based on a scientific approach to all those involved in the urban environment i.e. designers, builders and users. The present book takes stock of five years of research under the Chair. It starts by presenting some methodological bases of ecodesign, life cycle assessments, impact studies and methods for planning and transport. Several specific subjects are then covered i.e. public transport, parking, road traffic, the environmental profile of building materials, building retrofits, energy management and biodiversity. The last part of the book sets out how the knowledge and tools developed under the Chair were applied to a case study: Cit Descartes in Marne la Vallée Ile de France. This work is aimed at urban planners, local authorities, contracting clients, architects, engineering firms, contractors, building managers, research lecturers and anyone interested in the environmental quality of the places we live in.
