What kind of hope does science really have for the treatment of memory loss? And are there alternative interventions that can keep our aging bodies and minds sharp? What promise does genomic research actually hold? What would a world without Alzheimer's look like and how do we as individuals and as human communities get there? Backed up by research full of practical advice and information and infused with hope *THE MYTH OF ALZHEIMER'S* will liberate us from this crippling label teach us how to best approach memory loss and explain how to stave off some of the normal effects of aging.
