

Emotion Recognition: How Computers See Through Our Emotions

Capture

Collecting emotional cues such as facial expressions, voice tone and body language.

Process

Analyzing the collected cues using machine learning algorithms and computer vision techniques.

Interpret

Assigning a label to the emotion conveyed by the cues, for example, happy, sad, angry, or surprised.

Respond

Generating a response based on the recognized emotion, for instance, an avatar that creates facial expressions that mimic the user's emotions.

Affective Computing Affective Computing:

Affective Computing Rosalind W. Picard, 2000-07-24 According to Rosalind Picard if we want computers to be genuinely intelligent and to interact naturally with us we must give computers the ability to recognize understand even to have and express emotions The latest scientific findings indicate that emotions play an essential role in decision making perception learning and more that is they influence the very mechanisms of rational thinking Not only too much but too little emotion can impair decision making According to Rosalind Picard if we want computers to be genuinely intelligent and to interact naturally with us we must give computers the ability to recognize understand even to have and express emotions Part 1 of this book provides the intellectual framework for affective computing It includes background on human emotions requirements for emotionally intelligent computers applications of affective computing and moral and social questions raised by the technology Part 2 discusses the design and construction of affective computers Although this material is more technical than that in Part 1 the author has kept it less technical than typical scientific publications in order to make it accessible to newcomers Topics in Part 2 include signal based representations of emotions human affect recognition as a pattern recognition and learning problem recent and ongoing efforts to build models of emotion for synthesizing emotions in computers and the new application area of affective wearable computers Applied Affective Computing Leimin

Tian, Sharon Oviatt, Michal Muszynski, Brent Chamberlain, Jennifer Healey, Akane Sano, 2022-02-04 Affective computing is a nascent field situated at the intersection of artificial intelligence with social and behavioral science It studies how human emotions are perceived and expressed which then informs the design of intelligent agents and systems that can either mimic this behavior to improve their intelligence or incorporate such knowledge to effectively understand and communicate with their human collaborators Affective computing research has recently seen significant advances and is making a critical transformation from exploratory studies to real world applications in the emerging research area known as applied affective computing This book offers readers an overview of the state of the art and emerging themes in affective computing including a comprehensive review of the existing approaches to affective computing systems and social signal processing It provides in depth case studies of applied affective computing in various domains such as social robotics and mental well being It also addresses ethical concerns related to affective computing and how to prevent misuse of the technology in research and applications Further this book identifies future directions for the field and summarizes a set of guidelines for developing next generation affective computing systems that are effective safe and human centered For researchers and practitioners new to affective computing this book will serve as an introduction to the field to help them in identifying new research topics or developing novel applications For more experienced researchers and practitioners the discussions in this book provide guidance for adopting a human centered design and development approach to advance affective computing The
