Guidelines for feed use in carp and trout production systems in Central Asia and Eastern Europe Shipton, T. A., 2021-07-06 In aquaculture the provision of high quality aquafeeds that satisfy the nutritional requirements of the culture species and optimize growth are a prerequisite to improving production yields lowering production costs and improving economic returns to farmers Under semi intensive and intensive carp and trout culture aquafeed costs usually account for the highest single production cost typically accounting for 50 60 percent of total production costs The aquafeeds available to farmers vary widely with respect to quality nutritional value and cost Depending on the feed type production system and farmer preferences there are multiple feed management strategies that can be adopted by farmers In order to optimise feed use and minimise feed production costs it is essential that farmers select appropriate feeds and optimise their on farm feed management practices These guidelines are designed to provide farmers with practical guidance on how to select feeds and to optimise their use by implementing appropriate on farm feed management practices The guidelines provide an introduction to fish nutrition with a focus on the dietary nutritional requirements of commercially cultured carps and trout The types of aquafeeds live feeds supplementary farm made and commercially manufactured feeds their composition and nutritional value manufacture and use are discussed On farm feed management practices focus on feeding methods feed storage and methods to optimise feed consumption calculating feed rations feeding frequency assessing appetite and the feeding response

Handbook on Ingredients for Aquaculture Feeds J.W. Hertrampf, F. Piedad-Pascual, 2012-12-06 Current growth in global aquaculture is paralleled by an equally significant increase in companies involved in aquafeed manufacture Latest information has identified over 1 200 such companies not including those organizations in production of a variety of other materials i e vitamins minerals and therapeutics all used in varying degrees in proper feed formulation Aquaculture industries raising particular economically valued species i e penaeid shrimps and salmonids are making major demands on feed ingredients while relatively new industries such as tilapia farming portend a significant acceleration in demand for properly formulated aquafeeds by the end of the present decade and into the next century As requirements for aquafeeds increases shortages are anticipated in various ingredients especially widely used proteinaceous resources such as fish meal A variety of other proteinaceous commodities are being considered as partial or complete replacement for fish meal especially use of plant protein sources such as soybean meal In the past five years vegetable protein meal production has increased 10% while fish meal production has dropped over 50% since 1989 largely attributed to overfishing and serious decline in wild stock Throughout fisheries processing industries traditional concepts as waste have given way to more prudent approaches emphasizing total by product recovery Feed costs are a major consideration in aquaculture where in some groups i e salmonids high protein containing feeds using quality fish meal can account for as much as 40 to 60% of production costs

Menezes, A., Murekezi, P., Martone, E., Badiane, A.A., Mulonda, B.K.,2022-05-25 The Zambia Government in collaboration with FAO undertook the elaboration of this curriculum part I within the framework of the Zambia Aquaculture Enterprise Development Project UTF ZAM 077 ZAM Furthermore FAO complemented the practicality of this curriculum by drafting and refining the Training Manual part II which has been tested in many African countries and with different stakeholders To ensure complementarity of opportunities and clear progression of education and capacity development each actor involved in the sector should strive to network with teaching institutions researchers and producers to guarantee that the curriculum remains relevant and stays abreast of developments for aquaculture practitioners this will include developing national regional and international linkages with institutions involved in aspects of training for aquaculture Therefore this curriculum will function as a living document An overview on local alternative ingredients, aquafeed supply and feeding management in selected African countries Food and Agriculture Organization of the United Nations,Garcia Sampaio, F. (ed.); Hasan, M.R. (ed.); El-Sayed, A-F.M. (ed.), Aquaculture plays a vital role in enhancing food security in Africa but faces challenges in the fed aquaculture sector particularly in accessing and producing high quality aquafeeds To address this FAO organized the Expert Workshop on Local Alternative Ingredients Aquafeed Supply and Feeding Management in Egypt in 2023 Experts and stakeholders from nine African countries Cameroon Egypt Ghana Kenya Malawi Nigeria Uganda the United Republic of Tanzania and Zambia participated alongside representatives from governments academia development agencies the private sector and farming communities Pre workshop questionnaires informed national reports on feed ingredient supply feed manufacturing and feeding management practices These reports along with workshop discussions form the basis of this technical document comprising nine country analyses and a regional synthesis Common challenges identified include limited access to alternative feed ingredients poor feed preparation and storage practices inadequate monitoring of on farm feeding lack of investment for small scale producers low technical capacity among farmers poor feed quality and weak regulatory frameworks The synthesis report recommends key actions stabilizing feed ingredient supply and costs promoting training for feed producers and farmers improving on farm feed and water quality management enhancing data collection and analysis expanding access to finance and storage facilities and strengthening collaboration among stakeholders These measures aim to build a more efficient sustainable and resilient aquaculture sector across the region A Manual for Tilapia Business Management Ram C. Bhujel,2014-06-18 Tilapias are an increasingly important farmed fish for human consumption Hailed as an important source of protein for growing populations production is set to double within the next ten years and expand beyond traditional areas of production in Africa and Asia With a practical focus this book is aimed at tilapia farmers and producers describing best practice production methods egg management new technologies nutrition business practices marketing equipment maintenance accounting and logistics Aquaculture and Behavior Felicity Huntingford,Malcolm

Jobling, Sunil Kadri, 2012-02-13 Modern aquaculture is faced with a number of challenges including public concern about environmental impacts and the welfare of farmed fish. A fundamental understanding of fish biology is central to finding ways to meet these challenges and is also essential for maintaining the industry's sustainability. Furthermore, the behaviour of fish under culture situations has long been ignored despite heavy commercial losses that can result from fish stressed and hence disease prone due to bad husbandry techniques. This important book summarises the current understanding of the behavioural biology of farmed species and illustrates how this can be applied to improve aquaculture practice. Informative and engaging, *Aquaculture Behavior* brings the reader up to date with major issues pertaining to aquaculture. Everyone from fish farmers to upper level students will find this book a valuable and practical resource. Libraries in universities and research establishments where animal behavior, aquaculture, veterinary and biological sciences are studied and taught should have copies of this work on their shelves.

Aquaculture Training Manual, 1990 *Artificial Reproduction and Pond Rearing of the African Catfish Clarias Gariepinus in Sub-Saharan Africa* Gertjan de Graaf, Hans Janssen, Food and Agriculture Organization of the United Nations, 1996. The manual is based on the practical experiences of the authors on the artificial reproduction and pond rearing of the African catfish *Clarias gariepinus* within FAO field projects in the Central African Republic, the Republic of the Congo, Kenya and Nigeria. The manual is divided into five major sections dealing with: 1. general biology including natural feeding habits and reproduction; 2. artificial reproduction including induced propagation without and through hormone injection; 3. fry nursing in earthen ponds including pond preparation, fertilization, feeding and management; 4. monoculture including feeding methods; and 5. polyculture with Tilapia. In addition, information is provided concerning the economics of different fingerling and grow out farming practices in Africa and concerning diseases and hybridization.
