APA STYLE 7th Edition

What is APA Style?

- **APA style** does not refer to a writing style; rather, it is the editorial style developed by the American Psychological Association for use in the books and journals it publishes. Other social and behavioral sciences have also adopted APA style for their own written material.
- **Editorial style** refers to the rules or guidelines a publisher uses to ensure consistent presentation of written material. It includes:
 - Punctuation and abbreviations
 - Reference citations
 - Table construction
 - Using electronic references
 - Heading selection
 - Presenting statistics

Writing for the Behavioral & Social Sciences

Data Retention & Sharing

- It is the responsibility of researchers to give editors access to their information at any point in the publication process, even after publication.
- Authors should keep their data for at least five years after the publication date.

Plagiarism & Self-Plagiarism

- **Plagiarism** is expected that researchers will give proper credit for their research and not present the work of others as their own.
 - **Self-plagiarism:** Researchers should not present their own past publication as new scholarship.

- **Conflict of Interest**
 - It is best to note any activities or relationships that could appear to constitute a conflict of interest, even if the researcher doesn't believe they exist.

Writing Clearly & Concisely

Headings

- Headings show how:
 - The parts of your paper work together
 - Your paper is organized by indicating which parts are equally important and how each part relates to the others
- APA uses five heading formats:

Centered, Bold, Title Case Heading

Flush Left, Bold, Title Case Heading

Flush Left, Bold Italic, Title Case Heading

Indented, Bold, Title Case Heading, Ending With a Period.
Indented, Bold Italic, Title Case Heading, Ending With a Period

Writing Headings

- Do not use a heading for the introduction of your paper.
- Use the same heading level for topics of equal importance.
- Be sure that each heading is followed by at least two sub-headings or none at all. Do not divide your topic or subtopic into a single entry.
- Do not label headings with numbers or letters, or in sentence case.

Reducing Bias in Language

- Use the appropriate level of specificity.

EX: Using the word *man* to represent humanity is not as accurate as using the phrase *individuals* or *people*.
- Differences of any kind should be described only when relevant.
- Be sensitive to labels.
 - Use the singular they for a person whose name they do not know.
 - Avoid using adjectives to name or label people (e.g., the poor, the poor).
 - Call people what they call themselves.
 - Person-first language (e.g., a person with paraplegia), identity-first language (e.g., an autistic person), or both may be acceptable.
- Avoid false homonyms.
 - Use parallel designations for groups (e.g., compare gay men with straight men or lesbians, not the general public).
 - When referring to multiple social groups, don't put groups in order of social dominance by default (e.g., men and women, white Americans and racial minorities).
- **Reducing Bias by Topic**
 - **Gender:** Cultural, refers to a person's role, not their biological sex.
 - Use the singular they for individuals whose identified genders are not known.
 - Do not use terms that imply binaries (e.g., opposite genders).
 - **Social relationships:** A pattern of attraction, behavior, identity, and social contact—different from sexual preference.
