Production Design in the Contemporary American Film Beverly Heisner, 2004-01-30 While the viewer's eyes are trained on the actors the production design sets the mood for the film The design also subtly comments on the action and the characters moves the plot forward and adds to its symbolic content The production design of 23 films of the 1980s and 1990s is analyzed here The films are divided into five areas realistic films set in the present day stylized films including horror set in the present day period films period films that move through several decades and science fiction and fantasy films Among the movies analyzed are The Silence of the Lambs She's Got to Have It The Fisher King Ragtime Barton Fink Goodfellas and Alien The quality of the designs is assessed by a careful reading of the mise en scene Often the designers own words are used to describe the effects and the process involved in achieving them

South Temple Street Landmarks Bim Oliver, 2017-01-30 From the earliest days of settlement South Temple was Salt Lake's most prestigious street In 1857 William Staines built the Devereaux House Salt Lake's first of many mansions The once bustling Union Pacific Depot eventually found itself increasingly isolated Downtown's gleaming copper landmark overcame numerous hurdles before its construction was finally finished and the Steiner American Building helped usher in acceptance of Modernist architecture Evolving to reflect its continued prominence in 1975 the thoroughfare's core became the city's first local historic district and in 1982 it made the National Register of Historic Places Author and historian Bim Oliver celebrates the changing landmarks along these famous eighteen blocks

By-Right, By-Design Liz Falletta, 2019-06-26 Housing is an essential but complex product so complex that professionals

involved in its production namely architects real estate developers and urban planners have difficulty agreeing on good housing outcomes Less than optimal solutions that have resulted from a too narrow focus on one discipline over others are familiar high design that is costly to build that makes little contribution to the public realm highly profitable but seemingly identical cookie cutter dwellings with no sense of place and well planned neighborhoods full of generically designed unmarketable product types Differing roles languages and criteria for success shape these perspectives which in turn influence attitudes about housing regulation Real estate developers for example prefer projects that can be built as of right or by right meaning that they can be approved quickly because they meet all current planning zoning and building code requirements Design focused projects heretofore by design by contrast often require time to challenge existing regulatory codes pursuing discretionary modifications meant to maximize design innovation and development potential Meanwhile urban planners work to establish and mediate the threshold between by right and by design processes by setting housing standards and determining appropriate housing policy But just what is the right line between by right and by design By Right By Design provides a historical perspective conceptual frameworks and practical strategies that cross and connect the diverse professions involved in housing production The heart of the book is a set of six cross disciplinary comparative case studies each examining a significant Los Angeles housing design precedent approved by variance and its associated development type approved as of right Each comparison tells a different story about the often hidden relationships among the three primary disciplines shaping the built environment some of which uphold and others of which transgress conventional disciplinary stereotypes
