Solar Home Design Manual for Cool Climates Shawna Henderson, 2012-07-26 If you want an inexpensive environmentally sound source of energy for your home you need look no further than the sun Solar heat is not subject to rate increases is totally renewable pollution free and requires little or no technology It is here for you today and can easily provide up to 50% of your space and water heating requirements This is a book that simply and clearly explains the principles of using solar energy to heat your home Anyone building a new home or renovating an old one can incorporate one or several aspects of solar energy into their design Taking you through the process of designing a solar home from the ground up this manual is also a basic course in conservation and sustainable house design If you live in a heating climate meaning if you have space heating requirements for most of the year then this is an invaluable resource A house is the biggest single investment most of us will make in our lives the way it is built and how it operates can reflect a long term investment in both the building and the planet

The Final Empire Wm. H. Kötker, 2007-11 In spite of its tough message there is much compassion and humanity in *The Final Empire* Right away as you begin to read this work you sense increasingly the grand perspective in Kötker's words He is not speaking of anarchy He is offering vital common sense It's just that his meaning is so unavoidably political And so much against what we have been taught all our lives The materialistic values of civilization teach us that the accumulation of wealth is progress The material wealth of the civilization is derived from the death of the earth the soils the forests the fish stocks the free resources of flora and fauna The ultimate end of this is for all human species to live in giant parasitical cities of cement and metal while surrounded by deserts of exhausted soils The simple polar opposites are the richness and wealth of the natural life of earth versus the material wealth of people living out their lives in artificial environments This amounts to a direct challenge to humankind A demand for radical change A re envisioning of our part in the community of life and the precepts of individuality And Mr Kötker provides a strong argument for this case He traces the environmental scars of civilization through the ages Empire after empire desertification of the top soil winds its way around the globe in an erosive helix from China to India to Mesopotamia to Italy to North America As radical as it may seem at first glance *The Final Empire* is a necessary and sensible primer for the recovery of the planet It blends a critical statistical analysis of our deteriorating environment with a positivism of hope for a post empire age and a new whole human relation to the living community of Earth Dan Armstrong Author of the Novels *Prairie Fire* and *Taming the Dragon*

Constituent Imagination Stephen Shukaitis, David Graeber, Erika Biddle, 2007 From the ivory tower to the barricades Radical intellectuals explore the relationship between research and resistance

The Transition Handbook Rob Hopkins, 2008-02-25 Move from feeling anxious about the oil crisis to developing a positive vision and taking traction action to create a more self reliant existence with this ground breaking book We live in an oil dependent world and have become reliant in a very short space of time using vast reserves of oil in the process and without planning for when the supply is not

so plentiful Most of us avoid thinking about what happens when the oil runs out or becomes prohibitively expensive but the reality may not be as bad as we think The Transition Handbook shows how the inevitable and profound changes ahead could have a positive effect Written by permaculture expert Rob Hopkins he discusses the possibility of a rebirth of local communities which will generate their own fuel food and housing These will encourage the development of local currencies to keep money in the local area and unleash a local skilling up so that people have more control over their lives The growth in interest in the Transition model continues to be exponential There are now more than 35 formal Transition Initiatives in the UK including towns cities islands villages and peninsulas with more joining as the idea takes off With little proactivity at government level communities are taking matters into their own hands and acting locally If your community has not yet become a Transition Initiative this upbeat guide filled with beautiful black and white photographs offers you the tools to get started The Transition Handbook is the perfect manual to guide communities as they begin this energy descent journey
