Bodies And Barriers Dramas Of Disease Literature And Medicine:

Bodies and Barriers Angela Belli, 2008 *Bodies and Barriers* offers a collection of dramatic pieces of our time that provide an aesthetic perspective from which we view today's vital health issues. With each play exploring a different medical crisis, the collection covers a range of issues common to a diverse population irrespective of gender or race. Included are works examining how individuals confront the challenges posed by physical disability, aging, and terminal illness. These plays take as their subject the human form and its pathologies while providing a humanistic perspective from which to view men and women as they come to terms with a loss of physical and emotional well-being. Of broader interest is the attention these dramas frequently pay to questions of urgent social concern such as the dehumanizing effect of technology and the threat it poses to human values. The plays Angela Belli assembled demonstrate how the theatrical form can open discussion linking medicine to the larger society. Belli includes introductory essays to each of the works as well as a general introduction that presents an overview of the issues discussed in the anthology, their relevance to our culture, and their value in providing thematic material for the works included. This collection will be useful to students, health professionals, and the public. **The**

Routledge Companion to Performance and Medicine Gianna Bouchard, Alex Mermikides, 2024-04-15 *The Routledge Companion to Performance and Medicine* addresses the proliferation of practices that bridge performance and medicine in the contemporary moment. The scope of this book's broad range of chapters includes medicine and illness as the subject of drama and plays, the performativity of illness, and the medical encounter; the roles and choreographies of the clinic; the use of theatrical techniques such as simulation and role play in medical training; and modes of performance engaged in public health campaigns, health education projects, and health-related activism. The book encompasses some of these diverse practices and discourses that emerge at the interface between medicine and performance with a particular emphasis on practices of performance. This collection is a vital reference resource for scholars of contemporary performance, medical humanities, and the variety of interdisciplinary fields and debates around performance, medicine, health, and their overlapping collaborations. Hughes, 2009 This is a literary collection that illuminates the darkness of Alzheimer's disease. It is a unique collection of poetry and short prose about the disease written by 100 contemporary writers: doctors, nurses, social workers, hospice workers, daughters, sons, wives, and husbands whose lives have been touched by the disease.

Primary Care Angela Belli, John L. Coulehan, 2006 Medicine has always been an emotionally and spiritually challenging profession. Today, confronted with the rapid progress of technology, the shifting sands of health care economics, and glaring disparities in health care and human rights, physicians experience challenges that grow constantly more demanding. As a result, many doctors attempt to build into their lives opportunities for reflection and self-awareness. It is in this context that medical poetry has blossomed. *Primary Care*, the second anthology of

physician poems edited by Angela Belli and Jack Coulehan proves that the poetry movement in medicine continues to flourish. Fifty-two contemporary physician poets contribute one hundred poems that explore medical practice, interpersonal relationships, and the modern world. Their poems record instances of pain and suffering, joy and grief, humor and irony. Their subjects range from caregivers, patients, trainees, and teachers to poverty, injustice, and war throughout the world. In some cases, we find the poets in their professional milieu as they reveal interactions with patients and colleagues. Other poems address private worlds and family relationships. In others, the poets turn outward and direct their attention to social and global concerns. Characterized by an immense and kind-hearted sympathy for and empathy with those who are suffering, the poets recognize that everyone's life is diminished by the trauma of illness and death.

The Country Doctor Revisited Therese Zink, 2010. An anthology that addresses the changing nature of rural medicine in the United States. These authors courageously document the emotional and literally physical vulnerabilities they experience while delivering care in rural communities. This book exquisitely illustrates the complexity of dual relationships and boundary issues in rural practice. Family Medicine. Over the past thirty years, rural health care in the United States has changed dramatically. The stereotypical white-haired doctor with his black bag of instruments and his predominantly white small-town clientele has imploded. The global age has reached rural America. Independently owned clinics have given way to a massive system of hospitals; new technology now brings specialists right to the patient's bedside, and an increasingly diverse clientele has sparked the need for doctors and nurses with an equally diverse assortment of skills. *The Country Doctor Revisited* is a fascinating collection of essays, poems, and short stories written by rural health care professionals on the experiences of doctors and nurses practicing medicine in rural environments such as farms, reservations, and migrant camps. The pieces explore the benefits and burdens of new technology, the dilemmas in making ethically sound decisions, and the trials of caring for patients in a broken system. Alternately compelling, thought-provoking, and moving, they speak of the diversity of rural health care providers, the range of patients served in rural communities, the variety of settings that comprise the rural United States, and the resources and challenges health care providers and patients face today.

Literature and Medicine Joanne Trautmann Banks, Joanne Trautmann, Carol Pollard, 1975. Over 1000 entries to poems, novels, short stories, and plays. Emphasis on English language literature as well as that from France, Germany, Russia, Italy, and Spain. Citations arranged under chronological headings. Entry gives bibliographical information, topical words, and summary. References also listed under 39 topical words.

Return to The House of God Martin Kohn, Carol C. Donley, 2008. Reflections on Samuel Shem's *The House of God* and its impact on medical

resident education Samuel Shem's *The House of God* is widely regarded as one of the most influential novels about medical education in the twentieth century. Decades after being published, this satire still raises issues of how interns and residents are trained and how patients experience their treatment. *Return to The House of God* is a scholarly and creative response to the best-selling novel, exploring its impact on medical education, residency training, and the field of literature and medicine. Among the contributors are some of the foremost scholars in medical humanities and the most highly respected physician and nurse writers. This collection responds to the surprises, challenges, and wit of *The House of God*. Some contributors point out constructive changes that the novel stimulated, while others see today's medical residency experiences as still in need of a cure. Some contributors appreciate the novel's black humor regarding overworked residents in hospitals, while others wince and deplore it. A few even take their cue from Shem and transform their experiences into literature. Final words of the volume come from Janet Surrey, Shem's wife, and Stephen Bergman himself, aka Sam Shem, reflecting on thirty years of doctoring and writing. Teaching faculty in medical schools, residency programs, bioethics, and medical humanities, as well as Shem fans worldwide, will enjoy this important contribution to the study of literature and medicine.

Medical Storyworlds Elena Fratto, 2021-11-02. Though often seen as scientific or objective, medicine has a fundamentally narrative aspect. Much like how an author constructs meaning around fictional events, a doctor or patient narrates the course of an illness and treatment. In what ways have literary and medical storytelling intersected with and shaped each other? In *Medical Storyworlds*, Elena Fratto examines the relationship between literature and medicine at the turn of the twentieth century, a period when novelists were experimenting with narrative form and the modern medical establishment was taking shape. She traces how Russian writers such as Dostoevsky, Tolstoy, and Bulgakov responded to contemporary medical and public health prescriptions, placing them in dialogue with French and Italian authors including Romain Rolland and Svevo, and such texts as treatises by Paul Broca and Cesare Lombroso. In nuanced readings of these works, Fratto reveals how authors and characters question the rhetoric and authority of medicine and public health in telling stories of mortality, illness, and well-being. In so doing, she argues they provide alternative ways of thinking about the limits and possibilities of human agency and free will. Bridging the medical humanities, European literary studies, and Slavic studies, *Medical Storyworlds* shows how narrative theory and canonical literary texts offer a new lens on today's debates in medical ethics and bioethics.
