

# APA guidelines

FOR STUDENTS

## Introduction

- This is a guide to American Psychological Association (APA) rules used in academic writing.
- Important! The rules covered in this guide are accurate according to the *Publishing Manual of the American Psychological Association* 6th edition.

## What is APA Style?

- An editorial style developed by the American Psychological Association for use in the books and journals it publishes, using scholarly journal articles as its standard medium.
- Other social and behavioral sciences have also adopted APA style for their most serious materials, including dissertations, scholarly papers, and manuscripts.
- Designed to give all clarity by standardizing names and format.
- Focuses on ethical authorities and standards, as well as emphasizing concise writing.
- Editorial style refers to the rules or guidelines a publisher uses to ensure consistent presentation of written material. It includes:
  - Punctuation and abbreviations
  - Table construction
  - Heading schemes

- Reference citations
- Using electronic references
- Presenting statistics

## When to Use APA Style

- Used for manuscripts in the behavioral and social sciences as well as training and textbooks.
- The purpose of APA style is to share results with the scientific community in concise and recognizable format.
- The APA style for papers and requests that will be submitted or published in peer-reviewed scientific journals and the most prominent in the behavioral and social sciences.

## Scientific Writing

APA style focuses on following the goals of accuracy, ethics, and clarity in scientific writing.

### Primary Publications

- Researchers attend either primary publications or reviews; primary publications are original and recognized as accurate and valid due to their stringent academic standards.
- Primary publications as recognized by the APA:
  - Literature reviews
  - Describe a problem, explain prior research into the problem, and state the manuscript within the context of prior research.
- Case studies:
  - Document a problem, outline solutions, and explore applications or further needed research.
- Methodological articles:
  - Outline methodological approach
- Theoretical articles:
  - Explore existing literature and research to generate theories
  - Theoretical studies
- Describe original research as a tested hypothesis that develops and improves a problem, explains procedures and methods in the study, and describe, analyze, and discuss the results.

### Other APA Standards

- Data retention and sharing:
  - It is the responsibility of the researchers to give others access to their data in some form at any point in the publication process, even after publication.
  - Authors should keep their data for at least five years after the publication date.
- Plagiarism and self-plagiarism:
  - Plagiarism: It is important that researchers will give the proper credit for their research; authors must provide the credit of others in their work.
  - Self-plagiarism: Researchers should not present their own past publications as new scholarship.
  - In some circumstances, if a researcher wishes to duplicate previous research in a new context, they may do so with limited scope (e.g., describing new aspect of methodology) and acknowledging words.
  - If there is extensive word duplication, researchers must use a direct citation for the prior work.
- Conflict of interest:
  - It is best to note any potential or relationships that could appear to compromise a conflict of interest, even if the researcher doesn't believe such exists.
- Authorship and copyright:
  - All unpublished manuscripts are protected by federal statute and are unpublished by the original author and formally transferred.
  - Substantial contributions to a published work determine authorship of the work.
  - Authors should be listed in order of contribution, with the principal contributor first.
  - Names (i.e., Department head, assistant professors, graduate students) does not determine order of authorship.
  - If authors contribute equally to a work, they may be listed in the author note.

## Manuscript Structure & Content

### Journal Article Reporting Standards

- Reporting standards are not based on the typical focus; rather, they are based on the research design and implementation of the actual study.
- Outline reporting standards make research more easily generalized across fields and allows for researchers to efficiently perform meta-analysis.

### Manuscript Elements

- Title
- Author's name (initials)
  - Names should be listed: First (Given) Name, Middle Initial, Last Name (Surname)
  - APA lists in three:
    - List the names for the authors of a journal
    - Do not use titles (e.g., Professor, Dr.) or degrees (e.g., M.A., PhD)
- Institutional affiliation:
  - If an institutional affiliation exists, list city and state of residence.
- Author note:
  - First paragraph: Complete departmental affiliation
  - APA lists in three: Department of Sociology, State University, 88 E. Jones, Department of Sociology, State University
  - Second paragraph: Affiliation changes (if any)
    - One the Given (Author) is now at (affiliation)
    - APA lists in three: a Department of Sociology, University of Texas
  - Third paragraph:
    - Acknowledgments
    - ACK: Grants, financial support, and thanks for personal assistance with the manuscript
    - Special acknowledgments
    - ACK: Give credit to a previously published report or personal discussion and credits of interest
- Fourth paragraph: Contact information: provide complete mailing address and send the paragraph with an email address and no period
  - ACK: Correspondence concerning this article should be addressed to Robert T. Schacter, Department of Engineering, State University, Syracuse, NY 12103. Email: rtschacter@stateuniv.edu
- Abstract: A concise summary of the entire article's contents; abstracts should be:
  - Concise
  - Non-evaluative
  - Clear and concise
  - Description of results and methods
  - Typically between 150 and 250 words
- Keywords: A list of significant words that appear in the manuscript, but that begin with keywords in italic type and is followed by a list of words, separated by commas, in roman type
- Introduction: An outline of the specific problem and the author's research strategy; introductions should:
  - Introduce the problem
  - Describe the importance of the problem
  - Present evidence and existing information
  - Present hypothesis and research design
- Method: A detailed description of how the study was conducted
  - The method used should provide conceptual and operational definitions of variables
  - Including methodology should include:
    - Descriptive identification
