This splendid little manual by the textbook's own author restates the odd numbered problems from the book and provides crystal clear detailed solutions. Now available in print and ebook formats.

Scott, 2016 This comprehensive student manual has been designed to accompany the leading textbook by Bernard Schutz, A First Course in General Relativity, and uses detailed solutions cross referenced to several introductory and more advanced textbooks to enable self learners, undergraduates and postgraduates to master general relativity through problem solving. It provides detailed solutions to almost half of Schutz's exercises and includes 125 brand new supplementary problems that address the subtle points of each chapter. It includes a comprehensive index and collects useful mathematical results such as transformation matrices and Christoffel symbols for commonly studied spacetimes in an appendix. Supported by an online table categorising exercises, a Maple worksheet and an instructors manual, this text provides an invaluable resource for all students and instructors using Schutz's textbook.
