

Drill Exercise 1.1

$$v(t) = 5 - 10e^{-t} \text{ V}$$

$$\text{For } t = 0 \text{ s, } v(0) = 5 - 10e^{-0} = 5 - 10e^0 = 5 - 10 = \underline{-5 \text{ V}}$$

$$\text{For } t = 0.5 \text{ s, } v(0.5) = 5 - 10e^{-0.5} = 5 - 10e^{-0.5} = 5 - 3.48 = \underline{1.52 \text{ V}}$$

$$\text{For } t = 1 \text{ s, } v(1) = 5 - 10e^{-1} = 5 - 10e^{-1} = 5 - 3.68 = \underline{1.32 \text{ V}}$$

$$\text{For } t = 1.5 \text{ s, } v(1.5) = 5 - 10e^{-1.5} = 5 - 10e^{-1.5} = 5 - 2.48 = \underline{2.52 \text{ V}}$$

Drill Exercise 1.2

Can by Ohm's law, $v(t) = R i(t)$

$$R = -\frac{v(t)}{i(t)}$$

Since $i(t) = 25 \text{ mA}$ and $v(t) = -2.5 \text{ V}$,

$$\text{Then } R = -\frac{-2.5}{25 \times 10^{-3}} = 100 \Omega = \underline{100 \text{ k}\Omega}$$

Can by Ohm's law, $v(t) = R i(t)$

Since $R = 100 \Omega$ and $i(t) = 3e^{-t} - 7e^{-7t} \text{ A}$,

$$\text{Then } v(t) = 100(3e^{-t} - 7e^{-7t})$$

$$v(t) = \underline{300e^{-t} - 700e^{-7t} \text{ V}}$$

Drill Exercise 1.3

From Table 1-1 resistivity of Al = $2.82 \times 10^{-8} \Omega \text{ m}$

So, cross-sectional area $A = \frac{\pi d^2}{4} = \frac{\pi \times (2.5 \times 10^{-3})^2}{4} = 2.5 \times 10^{-6} \text{ m}^2$ (given)

$$\text{Resistance } R = \frac{\rho L}{A} = \frac{2.82 \times 10^{-8} \times 20}{2.5 \times 10^{-6}} = \underline{0.02256 \Omega}$$

ECOOP 2005 - Object-Oriented

Programming Andrew Black,2005-08-25 The 19th Annual Meeting of the European Conference on Object Oriented Programming ECOOP 2005 took place during the last week of July in Glasgow Scotland UK This volume includes the refereed technical papers presented at the conference and two invited papers It is traditional to preface a volume of proceedings such as this with a note that emphasizes the importance of the conference in its respective field Although such self evaluations should always be taken with a large grain of salt ECOOP is undisputedly the pre eminent conference on object orientation outside of the United States In its turn object orientation is today's principal technology not only for programming but also for design analysis and specification of software systems As a consequence ECOOP has expanded far beyond its roots in programming to encompass all of these areas of research which is why ECOOP has remained such an interesting conference But ECOOP is more than an interesting conference It is the nucleus of a technical and academic community a community whose goals are the creation and dissemination of new knowledge Chance meetings at ECOOP have helped to spawn collaborations that span the boundaries of our many subdisciplines bring together researchers and practitioners cross cultures and reach from one side of the world to the other The ubiquity of fast electronic communication has made maintaining these collaborations easier than we would have believed possible only a dozen years ago But the role of conferences like ECOOP in establishing collaborations has not diminished

The AGT Cytogenetics Laboratory Manual
Marilyn S. Arsham, Margaret J. Barch, Helen J. Lawce, 2017-03-03 Cytogenetics is the study of chromosome morphology structure pathology function and behavior The field has evolved to embrace molecular cytogenetic changes now termed cytogenomics Cytogeneticists utilize an assortment of procedures to investigate the full complement of chromosomes and or a targeted region within a specific chromosome in metaphase or interphase Tools include routine analysis of G banded chromosomes specialized stains that address specific chromosomal structures and molecular probes such as fluorescence in situ hybridization FISH and chromosome microarray analysis which employ a variety of methods to highlight a region as small as a single specific genetic sequence under investigation The AGT Cytogenetics Laboratory Manual Fourth Edition offers a comprehensive description of the diagnostic tests offered by the clinical laboratory and explains the science behind them One of the most valuable assets is its rich compilation of laboratory tested protocols currently being used in leading laboratories along with practical advice for nearly every area of interest to cytogeneticists In addition to covering essential topics that have been the backbone of cytogenetics for over 60 years such as the basic components of a cell use of a microscope human tissue processing for cytogenetic analysis prenatal constitutional and neoplastic laboratory safety and the mechanisms behind chromosome rearrangement and aneuploidy this edition introduces new and expanded chapters by experts in the field Some of these new topics include a unique collection of chromosome heteromorphisms clinical examples

of genomic imprinting an example driven overview of chromosomal microarray mathematics specifically geared for the cytogeneticist usage of ISCN's cytogenetic language to describe chromosome changes tips for laboratory management examples of laboratory information systems a collection of internet and library resources and a special chapter on animal chromosomes for the research and zoo cytogeneticist The range of topics is thus broad yet comprehensive offering the student a resource that teaches the procedures performed in the cytogenetics laboratory environment and the laboratory professional with a peer reviewed reference that explores the basis of each of these procedures This makes it a useful resource for researchers clinicians and lab professionals as well as students in a university or medical school setting

Designing Technology, Work, Organizations and Vice Versa

Enrico Attila Bruni, Laura Lucia Parolin, Cornelius Schubert, 2015-09-01 The concept of design has been defined in a multitude of ways and used in a variety of academic fields ranging from the classics of organizational and system design to studies on corporate culture aesthetics and consumption However in mainstream organization and management studies the concept of design has been black boxed and easily implied as an updated and more fashionable version of the traditional idea of structuring organizational processes At the same time working and organizing seem to be embedded nowadays in increasingly complex and situated technologies and practices If the spreading of information and communication technologies ICTs has changed workplaces and even the very meaning of workplace as an area marked by the physical presence of different human actors working and organizing mobilizes the joint action of humans technologies and knowledges The aim of the book is thus to discuss the relations among technologies work and organisations from multiple theoretical perspectives and to engage with questions about design as well as the sociomaterial foundations of working and organising The book focuses on the close study of practices and processes that inextricably link work and organisation to the use of artefacts and technological systems and vice versa exploring by means of different cases of organizational and design research articulations and disarticulations of daily work and design the doing of objects and technologies in everyday organizational life the reconstruction of organizational processes through technological and design practices the relation between learning innovations and technologies in organizational settings The book is addressed to graduate students PhDs scholars and researchers interested in the fields of Organization Studies Science and Technology Studies Sociology and Design as well as to professionals and practitioners interested in new methodological approaches towards the relations between technology work and organization
