Assessing Writers Knowledge And Processes Of Composing Writing Research:

Assessing Writers' Knowledge and Processes of Composing Lester Faigley, 1985 This volume offers a new perspective on the evaluation of writing The first half of the volume reviews research on composing and examines existing methods of evaluating writing The second half sets some limitations in assessing changes in composing processes describes some methods researchers in other areas have used to investigate cognitive processes and outlines a model of writers knowledge that can lead to comprehensive assessments of writing skills *Assessing Writers' Knowledge and Processes of Composing*, 1985 Contemporary Composition Studies Edith Babin, Kimberly Harrison, 1999-12-30 Composition studies is a rapidly growing and constantly changing field At present however graduate students new to the field and writing teachers who want to make new connections between theory and practice have little choice of current reference works that define key terms in composition studies and provide information about the scholars and researchers who have shaped and are shaping the discipline This book supplies this information in an easily accessible format and places both scholars and terms in the context of the field s development Included are alphabetically arranged entries for 108 individuals who have developed the field and 128 terms central to the discipline The first part of the book provides entries for leaders in composition studies Each entry identifies the areas in which the scholar has contributed most influentially to the field and provides both a chronological overview of the person s contributions and a bibliography of representative works The second part includes entries for terms that are problematic both for newcomers and for those already familiar with the discipline The entries for the terms show how the disciplinary context has shaped the ways in which they have been used The entries also indicate how established thinkers in composition studies and other disciplines have explained or defined the terms provide examples of the terms in context and list scholars often associated with them An appendix includes entries for scholars from other disciplines who have contributed to the field *Landmark Essays on Writing Process* Sondra Perl, 1994 First Published in 1995 Routledge is an imprint of Taylor Francis an informa company **A Pedagogy of Possibility** Kay Halasek, 1999 The author reconceives composition studies from a Bakhtinian perspective focusing on both the discipline s theoretical assumptions and its pedagogies Halasek explores the implications of Bakhtin s work and provides a model of scholarship balanced between practice and theory Speaking About Writing Alain Coulon, 1994-04-29 This volume makes a powerful case for the analysis of the spoken word as a source of data to study writing The contributors focus on issues involved in the collection analysis and interpretation of data Their approaches go beyond simple quantitative qualitative differences examining the very underpinnings of the various assumptions of distinct methodologies Divided into four major areas of inquiry the book looks at different aspects of conducting think aloud protocol analysis retrospective accounts discourse analysis and interviews in the field **Handbook on Measurement, Assessment, and Evaluation in Higher Education** Charles Secolsky, D. Brian Denison, 2017-07-31 In this valuable resource well known scholars present a detailed understanding of contemporary theories

and practices in the fields of measurement assessment and evaluation with guidance on how to apply these ideas for the benefit of students and institutions Bringing together terminology analytical perspectives and methodological advances this second edition facilitates informed decision making while connecting the latest thinking in these methodological areas with actual practice in higher education This research handbook provides higher education administrators student affairs personnel institutional researchers and faculty with an integrated volume of theory method and application **The SAGE Handbook of Writing Development** Roger Beard, Debra Myhill, Jeni Riley, Martin Nystrand, 2009-07-09 Writing development is currently the focus of substantial international debate because it is the aspect of literacy education that has been least responsive to central government and state reforms Teaching approaches in writing have been slower to change than those in teaching reading and pupil attainment in writing has increased at a much more modest rate than pupil attainment in reading This handbook critically examines research and theoretical issues that impact on writing development from the early years through to adulthood It provides those researching or teaching literacy with one of the most academically authoritative and comprehensive works in the field With expert contributors from across the world the book represents a detailed and valuable overview of a complex area of study Writing Elena L. Grigorenko, Elisa Mambrino, David D. Preiss, 2012-05-04 This book captures the diversity and richness of writing as it relates to different forms of abilities skills competencies and expertise Psychologists educators researchers and practitioners in neighboring areas are interested in exploring how writing develops and in what manner this development can be fostered but they lack a handy unified and comprehensive source of information to satisfy their interest The goal of this book is to fill this void by reflecting on the phenomenon of writing from a developmental perspective It contains an integrated set of chapters devoted to issues of writing how writing develops how it is and should be taught and how writing paths of development differ across writing genres Specifically the book addresses typologies of writing pathways of the development of writing skills stages of the development of writing individual differences in the acquisition of writing skills writing ability and disability teaching writing and the development and demonstration of expertise in writing *The End of Composition Studies* David W Smit, 2007-03-29 Setting forth an innovative new model for what it means to be a writing teacher in the era of writing across the curriculum The End of Composition Studies urges a reconceptualization of graduate work in rhetoric and composition systematically critiques the limitations of current pedagogical practices at the postsecondary level and proposes a reorganization of all academic units David W Smit calls into question two major assumptions of the field that writing is a universal ability and that college level writing is foundational to advanced learning Instead Smit holds writing involves a wide range of knowledge and skill that cannot be learned solely in writing classes but must be acquired by immersion in various discourse communities in and out of academic settings The End of Composition Studies provides a compelling rhetoric and rationale for eliminating the field and reenvisioning the profession as truly interdisciplinary a change that is necessary in order to fulfill the needs and

demands of students instructors administrators and our democratic society
