Assessment Measurement And Prediction For Personnel Decisions:

Assessment, Measurement, and Prediction for Personnel Decisions Robert M. Guion, 2011-02-25 Robert Guion's best seller is now available in this new second edition. This noted book offers a comprehensive and practical view of assessment based personnel decisions not available elsewhere in a single source. This edition more frankly evaluates the current research and practice and presents challenges that will change the basic thinking about staffing systems. This new edition suggests new directions for research and practice includes emphasis on modern computers and technology useful in assessment and pays more attention to prediction of individual growth and globalization challenges in the assessment process. The book will be of interest to faculty and students in Industrial Organizational psychology, human resource management and business IO psychologists in private business and public sector organizations who have responsibilities for staffing and an interest in measurement and statistics will find this book useful. The ^AOxford Handbook of Personnel Assessment and Selection

Neal Schmitt, 2013-12-15 The Oxford Handbook of Personnel Assessment and Selection distills the science and practice of employee selection. Now in paperback, this volume includes essential information about the validation process, individual difference constructs and measures and performance outcomes and measures and will be a comprehensive and authoritative reference and training tool in the field. **Handbook of Employee Selection** James L. Farr, Nancy T. Tippins, 2017-03-27

This second edition of the Handbook of Employee Selection has been revised and updated throughout to reflect current thinking on the state of science and practice in employee selection. In this volume a diverse group of recognized scholars inside and outside the United States balance theory, research and practice, often taking a global perspective. Divided into eight parts, chapters cover issues associated with measurement such as validity and reliability as well as practical concerns around the development of appropriate selection procedures and implementation of selection programs. Several chapters discuss the measurement of various constructs commonly used as predictors and other chapters confront criterion measures that are used in test validation. Additional sections include chapters that focus on ethical and legal concerns and testing for certain types of jobs, e.g. blue collar jobs. The second edition features a new section on technology and employee selection. The Handbook of Employee Selection, Second Edition provides an indispensable reference for scholars, researchers, graduate students and professionals in industrial and organizational psychology, human resource management and related fields.

Data-Driven Decision Making in Entrepreneurship Nikki Blacksmith, Maureen E. McCusker, 2024-04-02 Since the beginning of the 21st century there has been an explosion in startup organizations. Together these organizations have been valued at over 3 trillion. In 2019 alone, nearly 300 billion of venture capital was invested globally. Global Startup Ecosystem Report 2020. Simultaneously, an explosion in high volume and high velocity of big data is rapidly changing how organizations function. Gone are the days when organizations can make decisions solely on intuition, logic or experience. Some have gone as far as to say that data is the most valuable currency and resource available to businesses and startups are no exception.

However startups do differ from their larger counterparts and corporations in three distinct ways 1 they tend to have fewer resources time and specialized training to devote to data analytics 2 they are part of a unique entrepreneurial ecosystem with unique needs 3 scholarship and academic research on human capital data analytics in startups is lacking Existing entrepreneurship research is primarily conducted in business schools There needs to be more integration of industrial organizational psychology and entrepreneurship This book was designed to do just that to demonstrate how organizational psychology with a focus on human capital data and analytics can advance the science and practice of entrepreneurship This book is purposefully designed to address the unique idiosyncrasies of the science research and practice of startups and the entrepreneurial ecosystem Each chapter takes a science practice perspective highlighting a specific human capital management topic e g learning and development team effectiveness human capital due diligence and discusses how leveraging data can help enhance decision making The volume is grounded in sound theory and practice of organizational psychology entrepreneurship and management It is divided into three parts 1 human capital assessment and development for startups 2 understanding startup situations environments and support systems and 3 measuring startup level performance
