Assistive Technology Assessment Handbook Stefano Federici, Marcia Scherer, 2017-11-23 Assistive Technology Assessment Handbook Second Edition proposes an international ideal model for the assistive technology assessment process outlining how this model can be applied in practice to reconceptualize the phases of an assistive technology delivery system according to the biopsychosocial model of disability The model provides reference guidelines for evidence based practice guiding both public and private centers that wish to compare evaluate and improve their ability to match a person with the correct technology model This second edition also offers a contribution to the Global Cooperation on Assistive Technology GATE initiative whose activities are strongly focused on the assistive products service delivery model Organized into three parts the handbook gives readers a toolkit for performing assessments describes the roles of the assessment team members among them the new profession of psychotechnologist and reviews technologies for rehabilitation and independent living including brain computer interfaces exoskeletons and technologies for music therapy Edited by Stefano Federici and Marcia J Scherer this cross cultural handbook includes contributions from leading experts across five continents offering a framework for future practice and research

People and Computers XII Harold Thimbleby, Brid O'Connell, Peter J. Thomas, 2013-03-14 Most organisations try to protect their systems from unauthorised access usually through passwords Considerable resources are spent designing secure authentication mechanisms but the number of security breaches and problems is still increasing DeAlvarez 1990

Gordon 1995 Hitchings 1995 Unauthorised access to systems and resulting theft of information or misuse of the system is usually due to hackers cracking user passwords or obtaining them through social engineering System security unlike other fields of system development has to date been regarded as an entirely technical issue little research has been done on usability or human factors related to use of security mechanisms Hitchings 1995 concludes that this narrow perspective has produced security mechanisms which are much less effective than they are generally thought to be Davis Price 1987 point out that since security is designed implemented used and breached by people human factors should be considered in the design of security mechanism It seems that currently hackers pay more attention to human factors than security designers do The technique of social engineering for instance obtaining passwords by deception and persuasion exploits users lack of security awareness Hitchings 1995 also suggests that organisational factors ought to be considered when assessing security systems The aim of the study described in this paper was to identify usability and organisational factors which affect the use of passwords The following section provides a brief overview of authentication systems along with usability and organisational issues which have been identified to date 1 *Ergonomics for Rehabilitation Professionals* Shrawan Kumar, 2009-04-27 Despite the apparently distinct differences between the disciplines of ergonomics and rehabilitation they deal with the same issues although at different ends of the spectrum Keeping this in mind *Ergonomics for Rehabilitation Professionals* explores their philosophies and goals their parallel divergent and complementary aspects It traces the
