Innovation Federico Colecchia, Eleonora Ceccaldi, Daniele Giunchi, Fang Wang, Rui Qin, 2025-06-09 Emerging technologies
such as machine learning and immersive technologies including virtual reality and augmented reality hold great potential for
driving disruptive healthcare innovation However the adoption of digital technology in healthcare including use of data
driven tools in support of clinical decision making and patient facing applications relying on consumer electronic devices is
often hindered by issues of user experience trust equitability and fairness There is increasing recognition of a need to
facilitate further convergence between the development of emerging technologies and user centered design research for
healthcare with a view to achieving a positive impact on patients care professionals and the healthcare system This article
collection addresses current development trends relating to user centered digital healthcare innovation based on machine
learning and immersive technologies in order to identify opportunities associated with the deployment of new solutions in a
range of environments including clinical domestic and educational settings and barriers to the adoption of technology by end
users A key aim is to identify opportunities for strengthening interdisciplinary collaboration as well as methods of lowering
barriers and overcoming obstacles for the benefit of patients care professionals and the healthcare system Examples of
potential outcomes are effective design and use of solutions based on machine learning and immersive technologies to
improve user experience strategies to facilitate ethical development of digital technology for healthcare and methods of
encouraging adoption of advanced tools developed in line with principles of equitability and fairness Articles should address
issues of user centered digital healthcare innovation driven by machine learning and immersive technologies Submissions
should ideally be positioned at the intersection of digital technology development with user centered design although
contributions more technical in nature as well as user experience studies are also welcome A non exhaustive list of suitable
topics and manuscript types is given below Machine learning and or immersive technologies including augmented reality and
virtual reality for user centered digital healthcare Clinical decision support systems Patient facing applications Tools for
education and training of future medical professionals Potential barriers to adoption of technology issues of user experience
