Bad Blood A Cautionary Tale:

Bad Blood Caroline Grace Evans, *Bad Blood* is more than just a tale of corporate greed and a fallen tech icon. It is a gripping account of the rise and fall of Theranos, a company promising to revolutionize healthcare with its revolutionary blood testing technology. Meet Elizabeth Holmes, the charismatic visionary who captivated Silicon Valley with her ambition and drive. Witness the dizzying ascent of Theranos, fueled by hype and a promise of disruption. But beneath the surface, a web of deception and lies was being spun. This book takes you inside the heart of Theranos, revealing the shocking truth behind the company's supposed innovations and the ruthless tactics employed to maintain its facade of success. From the first whispers of doubt to the explosive Wall Street Journal investigation, you'll experience the unraveling of a once-lauded startup and the downfall of its charismatic founder. *Bad Blood* is more than just a story of corporate fraud; it is a deeply human story of ambition, betrayal, and the price of deception. It's a cautionary tale that exposes the dark side of Silicon Valley's culture of innovation and the seductive power of a fake-it-till-you-make-it mentality. This book will leave you questioning the boundaries of ambition, the allure of disruption, and the true cost of success.

The Bleeding Disease Stephen Pemberton, 2011-07-15 By the 1970s a therapeutic revolution decades in the making had transformed hemophilia from an obscure hereditary malady into a manageable bleeding disorder Yet the glory of this achievement was short lived The same treatments that delivered some normalcy to the lives of persons with hemophilia brought unexpectedly fatal results in the 1980s when people with the disease contracted HIV AIDS and Hepatitis C in staggering numbers The Bleeding Disease recounts the promising and perilous history of American medical and social efforts to manage hemophilia in the twentieth century This is both a success story and a cautionary tale one built on the emergence in the 1950s and 1960s of an advocacy movement that sought normalcy rather than social isolation and hyper protectiveness for the boys and men who suffered from the severest form of the disease Stephen Pemberton evokes the allure of normalcy as well as the human costs of medical and technological progress in efforts to manage hemophilia He explains how physicians advocacy groups the blood industry and the government joined patients and families in their unrelenting pursuit of normalcy and the devastating unintended consequences that pursuit entailed Ironically transforming the hope of a normal life into a purchasable commodity for people with bleeding disorders made it all too easy to ignore the potential dangers of delivering greater health and autonomy to hemophilic boys and men

Blood on Their Hands Eric Weinberg, Donna Shaw, 2017-09-15 A few short years after HIV first entered the world blood supply in the late 1970s and early 1980s over half the hemophiliacs in the United States were infected with the virus But this was far more than just an unforeseeable public health disaster Negligent doctors government regulators and Big Pharma all had a hand in this devastating epidemic Blood on Their Hands is an inspiring firsthand account of the legal battles fought on behalf of hemophiliacs who were unwittingly infected with tainted blood As part of the team behind the key class action litigation filed by the infected young New Jersey lawyer Eric Weinberg was faced with a daunting task to prove the negligence of a powerful well connected global industry worth billions Weinberg and journalist Donna Shaw tell the dramatic story of how idealistic attorneys and their heroic mortally ill clients fought to achieve justice and prevent further infections A stunning exposé of one of the American medical system's most shameful debacles Blood on Their Hands is a rousing reminder that through perseverance the victims of corporate greed can sometimes achieve great victory

The Perturbed Self Mengxing Fu, 2021-08-30 By comparison of late nineteenth century ghost stories between China and Britain this monograph traces the entangled dynamics between ghost story writing history making and the moulding of a gendered self Associated with times of anxiety groups under marginalisation and tensions with orthodox narratives ghost stories from two distinguished literary traditions are explored through the writings and lives of four innovative writers of this period namely Xuan Ding and Wang Tao in China and Vernon Lee and E Nesbit in Britain Through this cross cultural investigation the book illuminates how a gendered self is constructed in each culture and what cultural baggage and assets are brought into this construction It also ventures to sketch a common poetics underlying a literature of the anomaly that can be both destabilising and constructive subversive and coercive This book will be welcomed by the Gothic studies community as well as scholars working in the fields of women s writing nineteenth century British literature and Chinese literature
