Bad Blood Hemophilia

Jeffrey A. Bennett

Bad Blood Hemophilia:

Bad Blood Vic Parsons, 1995 **A Case of Bad Blood** Rosemary Daly, Paul Cunningham, 2003-01-01 **Hemophilia** Randall McPartland, 2015-12-15 Hemophilia and other bleeding disorders loom over the lives of people with these conditions and present constant danger This book describes the condition and the genetic causes behind it follows researchers on their path to scientific discovery identifies people who have excelled despite having the problem and tracks the latest treatments and research aimed at helping those living with it Sidebars highlight medical breakthroughs and the people who made them

Banning Queer Blood Jeffrey A. Bennett, 2015-09-30 Frames blood donation as a performance of civic identity closely linked to the meaning of citizenship In *Banning Queer Blood* Jeffrey Bennett frames blood donation as a performance of civic identity closely linked to the meaning of citizenship However with the advent of HIV came the notion of blood donation as a potentially dangerous process Bennett argues that the Food and Drug Administration by employing images that specifically depict gay men as contagious has categorized gay men as a menace to the nation The FDA's ban on blood donation by gay men served to propagate the social misconceptions about gay men that continue to circulate within both the straight and LGBT Queer communities Bennett explores the role of scientific research cited by these banned blood policies and its disquieting relationship to government agencies including the FDA Bennett draws parallels between the FDA's position on homosexuality and the historical precedents of discrimination by government agencies against racial minorities The author concludes by describing the resistance posed by queer donors who either lie in order to donate blood or protest discrimination at donation sites and by calling for these prejudiced policies to be abolished

Blood Feuds Eric A. Feldman, Ronald Bayer, 1999 In the mid 1980s public health officials in North America Europe Japan and Australia discovered that almost half of the hemophiliac population as well as tens of thousands of blood transfusion recipients had been infected with HIV tainted blood This book provides a comparative perspective on the political legal and social struggles that emerged in response to the HIV contamination of the industrialized world's blood supply It brings together chapters on the experiences of the United States Japan France Canada Germany Denmark Italy and Australia with four comparative essays that shed light on the cultural institutional and economic dimensions of the HIV blood disaster

Senses and Citizenships Susanna Trnka, Christine Dureau, Julie Park, 2013-05-02 What does disgust have to do with citizenship How might pain and pleasure movement taste sound and smell be configured as aspects of national belonging *Senses and Citizenships: Embodying Political Life* examines the intersections between sensory phenomena and national and supra national forms of belonging introducing the new concept of sensory citizenship Expanding upon contemporary understandings of the rights and duties of citizens the volume presents anthropological investigations of the sensory aspects of participation in collectivities such as face to face communities ethnic groups nations and transnational entities Rethinking relationships between ideology aesthetics affect and bodily experience the authors reveal the multiple political effects of the senses The book demonstrates how various elements

of political life including some of the most fundamental aspects of citizenship rest not only upon our senses but on their perceived naturalization Vivid ethnographic examples of sensory citizenship in Europe the United States the Pacific Asia and the Middle East explore themes such as sight in political constructions smell and ethnic conflict pain in the constitution of communities national soundscapes taste in national identities movement memory and emplacement *The Life and Death of Ryan White* Paul M. Renfro, 2024-10-11 In the 1980s as HIV AIDS ravaged queer communities and communities of color in the United States and beyond a straight white teenager named Ryan White emerged as the face of the epidemic Diagnosed with hemophilia at birth Ryan contracted HIV through contaminated blood products In 1985 he became a household name after he was barred from attending his Indiana middle school As Ryan appeared on nightly news broadcasts and graced the covers of popular magazines he was embraced by music icons and well known athletes achieving a curious kind of stardom Analyzing his struggle and celebrity Paul M Renfro s powerful biography grapples with the contested meanings of Ryan s life death and afterlives As Renfro argues Ryan s fight to attend school forced the American public to reckon with prevailing misconceptions about the AIDS epidemic Yet his story also reinforced the hierarchies at the heart of the AIDS crisis Because the innocent Ryan had contracted HIV through no fault of his own as many put it his story was sometimes used to blame presumably guilty populations for spreading the virus Reexamining Ryan s story through this lens Renfro reveals how the consequences of this stigma continue to pervade policy and cultural understandings of HIV AIDS today **Ricky Ray Hemophilia Relief Fund Act of 1995** United States. Congress. House. Committee on the Judiciary. Subcommittee on Immigration and Claims, 1997 Risky Rhetoric J. Blake Scott, 2003 *Risky Rhetoric AIDS and the Cultural Practices of HIV Testing* is the first book length study of the rhetoric inherent in and surrounding HIV testing In addition to providing a history of HIV testing in the United States from 1985 to the present J Blake Scott explains how faulty arguments about testing s power and effects have promoted unresponsive and even dangerous testing practices for so called normal subjects as well as those deemed risky Drawing on classical rhetoric as well as Michel Foucault s theorizing of the examination as a form of disciplinary power this study explores how HIV testing functions as a disciplinary technology that shapes subjects and exerts power over individual bodies and populations Testing has largely been deployed to protect those defined as normal members of the general population by detecting managing and even punishing those diagnosed as risky e g gay and bisexual men poor women of color But Scott reveals that testing s function of protection through detection has been fueled in part by faulty arguments that exaggerate testing s interventive power and benefits These arguments have also created a perception that testing is a magic bullet By overestimating the benefits of HIV testing and overlooking its contingencies and harmful effects dominant arguments about testing have enabled a shortsighted public health response to HIV and unresponsive testing policies The ultimate goal of *Risky Rhetoric AIDS and the Cultural Practices of HIV Testing* is to offer strategies to policymakers HIV educators and test counselors and other rhetors for developing more responsive and

egalitarian testing related rhetorics and practices FDA Regulation of Blood Safety United States. Congress. House.
Committee on Government Reform and Oversight. Subcommittee on Human Resources, 1998
