news and reviews *Britain's Best Canal Journeys* John Sergeant, 2015-02-03 Today there are more craft on our canals than even during their industrial heyday Thanks to the pleasures of boating our canals are vibrant and thriving once again Yet this would have astounded the people who built them and lived hard lives to keep the boats and their cargo moving In Barging Round Britain John Sergeant sets out both to explore eight of the best trips among our more than three thousand miles of canals and to tell the fascinating story of their origins and workings Opening up a too often neglected world right on our doorstep he seeks out pleasures and sights while stopping to examine the part the canals and their extraordinary builders played in our industrial heritage from Josiah Wedgwood's need to safely transport his fragile bone china to engineer James Brindley's visionary solutions to complications of geology and landscape Exploring the history of British inland navigation through eight of the most celebrated waterways including the Caledonia Grand Union and the Trent and Mersey Canals travelled by John Sergeant in the ITV series Barging Round Britain this book will delight seasoned boaters and encourage those dreaming of their first canal holiday to dip their toes in the water It is the book for anyone with a passion for Britain and its waterways There is something very British in the way we cherish the canals It takes us back to a time when the pace of life was slower Canals: the Making of a Nation Liz McIvor, 2016-08-11 Canals hold a unique place in British culture with associations of lazy summer afternoons journeying through lush green countryside But as Liz McIvor explains in the book to accompany her BBC series the story of our canals is also the story of how modern Britain was born It was the canals that helped open up the trade of the Industrial Revolution furthered the new science of geology and even ushered in a new form of architecture The legacy of our canals is all around us In *Canals The Making of a Nation* McIvor takes us on a journey across the network of English canals to tell a deeper story of how our waterways changed our lives It tells a very modern tale full of high finance and greedy investors cheap labour and the struggle for workers' rights and new frontiers in family and child welfare It tells a unique and compelling exploration of Britain's golden age Britain's Canals Anthony Burton, Derek Pratt, 2020-05-14 Britain's Canals is a charming and insightful exploration into the amazing architecture and engineering wonders that surround Britain's inland waterways from the awe inspiring 30 lock flight on the Worcester and Birmingham Canal to the delightful chocolate box lock keepers cottages that line the cut of every canal to masterpieces such as the 18 arch Pontcysyllte aqueduct the highest aqueduct in the world to beautiful bridges grand company buildings the social hubs that were and still are canal side pubs plus so much more In contrast to many inland waterways books which are organised geographically by canal Britain's Canals is structured thematically with chapters covering the line the shape of the canal locks and lock cottages bridges aqueducts lifts and planes company buildings wharves basins and quays and finally the canal side pub Each chapter explores how these features were created and have changed through history right through to the present with plenty of ideas for places to visit plus full information on how to get to them An abundance of full colour photography throughout both historical and modern day will delight readers and
