Miller,2008-09-15 Over the past half century bookselling like many retail industries has evolved from an arena dominated by independent bookstores to one in which chain stores have significant market share And as in other areas of retail this transformation has often been a less than smooth process This has been especially pronounced in bookselling argues Laura J Miller because more than most other consumer goods books are the focus of passionate debate What drives that debate And why do so many people believe that bookselling should be immune to questions of profit In Reluctant Capitalists Miller looks at a century of book retailing demonstrating that the independent chain dynamic is not entirely new It began one hundred years ago when department stores began selling books continued through the 1960s with the emergence of national chain stores and exploded with the formation of superstores in the 1990s The advent of the Internet has further spurred tremendous changes in how booksellers approach their business All of these changes have met resistance from book professionals and readers who believe that the book business should somehow be above market forces and instead embrace more noble priorities Miller uses interviews with bookstore customers and members of the book industry to explain why books evoke such distinct and heated reactions She reveals why customers have such fierce loyalty to certain bookstores and why they identify so strongly with different types of books In the process she also teases out the meanings of retailing and consumption in American culture at large underscoring her point that any type of consumer behavior is inevitably political with consequences for communities as well as commercial institutions **Selling Online** Donny Lowy,2004 Selling Online Beyond eBay Learn the best kept secrets of starting and running an online business that are being used by the real rich dads who are becoming the new next door millionaires If you want to develop multiple streams of income or you want to learn how to really make money online then you need Selling Online Your own online business can help you develop additional sources of income that when set up properly can run on autopilot While a 9 5 job and a traditional business require long hours and in the case of a business usually a large investment an online business can help you make more money while freeing up your time Selling Online will teach you everything you need to know to start and run an extremely profitable and lucrative online business You will even learn how to maximize the profit potential of your current business by using the highly effective power of Internet marketing Get ready to dramatically increase your current revenues within a short period of time If you are familiar with the amount of money affiliate programs can make you then you will want to read Selling Online so that you can start profiting from this truly 24 hour passive cash cow method Selling Online is based on the advice experiences and strategies that the most successful online entrepreneurs have been using for years to quietly develop online fortunes If you have a business you would like to take online or you already have an online business that you want to grow or you would simply love to start your own
