Daoism in Japan Jeffrey L. Richey, 2015-05-01 Like an ancient river Daoist traditions introduced from China once flowed powerfully through the Japanese religious landscape forever altering its topography and ecology Daoism's presence in Japan still may be discerned in its abiding influence on astrology divination festivals literature politics and popular culture not to mention Buddhism and Shintō Despite this legacy few English language studies of Daoism's influence on Japanese religious culture have been published *Daoism in Japan* provides an exploration of the particular pathways by which Daoist traditions entered Japan from continental East Asia After addressing basic issues in both Daoist Studies and the study of Japanese religions including the problems of defining Daoism and Japanese the book looks at the influence of Daoism on ancient medieval and modern Japan in turn To do so the volume is arranged both chronologically and topically according to the following three broad divisions Arrivals c 5th 8th centuries CE Assimilations 794 1868 and Apparitions 1600s present The book demonstrates how Chinese influence on Japanese religious culture ironically proved to be crucial in establishing traditions that usually are seen as authentically even quintessentially Japanese Touching on multiple facets of Japanese cultural history and religious traditions this book is a fascinating contribution for students and scholars of Japanese Culture History and Religions as well as Daoist Studies

Wearing Cultural Styles in Japan Christopher S. Thompson, John W. Traphagan, 2012-02-01 This groundbreaking collection examines the regional dynamics of state societies looking at how people use the concepts of urban and rural traditional and modern and industrial and agricultural to define their existence and the experience of living in contemporary Japanese society The book focuses on the Tohoku Northeast region which many Japanese consider rural agrarian undeveloped economically and the epitome of the traditional way of life While this stereotype overstates the case the region is home to one of Japan's largest cities most Japanese contrast Tohoku everything traditional with Tokyo everything modern However the contributors show how various regional phenomena internationalization lacquerware production farming enka modern Japanese ballads women's roles and professional dance combine the traditional the modern and the global *Wearing Cultural Styles in Japan* demonstrates that while people use the dichotomies of urban rural and traditional modern in order to define their experiences these categories are no longer useful in analyzing contemporary Japan

Richard Wright's Travel Writings Virginia Whatley Smith, 2012-01-31 Attracted to remote lands by his interest in the postcolonial struggle Richard Wright 1908-1960 became one of the few African Americans of his time to engage in travel writing He went to emerging nations not as a sightseer but as a student of their cultures learning the politics and the processes of social transformation When Wright fled from the United States in 1946 to live as an expatriate in Paris he was exposed to intellectual thoughts and challenges that transcended his social and political education in America Three events broadened his world view his introduction to French existentialism the rise of the Pan Africanist movement to decolonize

Africa and Indonesia's declaration of independence from colonial rule in 1945. During the 1950s as he traveled to emerging nations his encounters produced four travel narratives: *Black Power* 1953, *The Color Curtain* 1956, *Pagan Spain* 1956, and *White Man Listen* 1957. Upon his death in 1960 he left behind an unfinished book on French West Africa which exists only in notes, outlines, and a draft. Written by multinational scholars, this collection of essays exploring Wright's travel writings shows how in his hands the genre of travel writing resisted, adapted, or modified the forms and formats practiced by white authors. Enhanced by nine photographs taken by Wright during his travels, the essays focus on each of Wright's four separate narratives as well as upon his unfinished book and reveal how Wright drew on such non-Western influences as the African American slave narrative and Asian literature of protest and resistance. The essays critique Wright's representation of customs and people and employ a broad range of interpretive modes including the theories of formalism, feminism, and postmodernism among others. Wright's travel books are proved here to be innovative narratives that laid down the roots of such later genres as postcolonial literature, contemporary travel writing, and resistance literature. Virginia Whatley Smith is an associate professor of English at the University of Alabama, Birmingham. Her work has appeared in *African American Review*, *Mississippi Quarterly*, and *MLA Approaches to Teaching Wright's Native Son*.
