Building Envelopes An Integrated Approach Architecture Briefs:

Building Envelopes Jenny Lovel, 2013-07-02 Few parts of a building work harder than its envelope also known as its facade The envelope is the part of the building most visible from the outside so it should be visually appealing but it can also have the biggest effect on the well being and safety of its occupants so the envelope should help heat and cool the building allow light into it and provide necessary structure Too often a building's envelope is more aesthetically striking than functional or vice versa A great building envelope though architecturally integrates all of its elements

Executive Design of the Façade Systems Ingrid Paoletti, Massimiliano Natri, 2023-09-25 The book examines the typological and technological constitution of the principal advanced facade systems in the contemporary design and experimental scenario proposing itself as a knowledge and operational tool currently lacking in the technical literature of the sector at an international level It considers the field of advanced facade systems in a scientific way constituting a support for the study and the executive design The book investigates in detail in an analytical form the constitution of the components on a typological and geometrical functional and constructive level on the basis of the documents and knowledges acquired from the essential contemporary production and construction references At the same time the book is configured in a handbook form as a reference for understanding and application with respect to traditional and complex facade systems For each main type of facade the book provides explanations and scientific information for investigating and designing the advanced facades according to the characteristics of the mullions and transoms facade system stick system of the structural sealant glazing facade system of the unit facade system of the suspended facade system and of the double skin facade system

Technology of the Multi-Layer Façade Systems Ingrid Paoletti, Massimiliano Natri, 2025-08-29 The book explores the design production and construction processes of the multi layer facade systems towards the principles of environmental and energy sustainability through the drafting of an explanatory and operative reference instrument The work provides the planning of a technical guide focusing on the executive design and construction methodologies The scientific basis of the research implies the definition of the main functional typologies established on the analysis conducted on the experimental case studies with the aim of achieving a codification of the performance and executive potentialities The development of the book as a technical guide on the multi layer facade systems involves the possibilities of technology transfer towards different building types and intended uses with the aim of increasing hygro thermal lighting and acoustic performance through the application of technical skins devices and integrated screens on the external enclosures Moreover the book explains the modes of technology transfer through the use of standard and non customized products so as to improve the diffusion in the production and construction of mass produced systems and components

Smart Architecture - A Sustainable Approach for Transparent Building Components Design Valentina Frighi, 2021-08-25 This book explores the specific role that glazing technologies play within the world of smart architecture as important components of contemporary and

future sustainable architectural and technological research Smart Architecture begins with a definition of the concept of smart in architecture and examines how innovative technologies and materials have shaped buildings over the years The author then provides a supporting database of contemporary smart architecture mapping adopted strategies recognizing common patterns and evaluating current and future trends in the context of smart building envelopes energy efficiency and the development of high potential innovative building components The book proceeds with a focus on the specific role that glazing technologies play in this framework and provides a systematic methodology to quantify options for the effective integration of transparent building components within advanced and innovative building envelope systems

Construction of the Façade Systems Ingrid Paoletti, Massimiliano Nastri, 2023-12-04 The book explores the advanced façade systems according to the productive and constructive contents in a cognitive and operative form as a manual text to provide guidelines for researchers technicians and professionals It provides operational guidance for the technological design production planning and site executive coordination for the realization of façade systems The analysis deals with the main building elements and technical interfaces The study of the façade systems after explaining the anchoring structures and their connections to the load bearing elements investigates the criteria for the assembly between the framings In particular the book examines the technical interfaces of the main advanced envelope systems with respect to the functional constructive and applicative coordination procedures of the mullions and transoms framing of the structural sealant glazing façade system of the unit façade system of the suspended façade system and of the double skin façade system The technical and manual character of the book is also expressed through the analysis of the functional and application procedures of the gaskets with respect to the façade systems in order to prevent the transmission of air and water loads the analysis focuses on the connections between the framing and the enclosure elements of the envelope in accordance with the compensation of height differences in order to guarantee impermeability airtightness and insulation Then the book describes the assembly and interface conditions between elements of different composition and production within the façade systems the examination of the technical interfaces involves the development and application of sealants based on the loads exerted on the jointing devices in order to fulfill the requirements of sealing and tightness with respect to mechanical thermal and hygrometric water air and wind stresses Moreover the study of the envelope systems examines the methodologies directed toward fulfilling the requirements with respect to the actions caused by fire loads considering the contents related to both components and connections and fixing surfaces

Writing About Architecture Alexandra Lange, 2012-02-29 Extraordinary architecture addresses so much more than mere practical considerations It inspires and provokes while creating a seamless experience of the physical world for its users It is the rare writer that can frame the discussion of a building in a way that allows the reader to see it with new eyes Writing About Architecture is a handbook on writing effectively and critically about buildings and cities Each chapter opens with a reprint of a significant essay written by a

renowned architecture critic followed by a close reading and discussion of the writer's strategies Lange offers her own analysis using contemporary examples as well as a checklist of questions at the end of each chapter to help guide the writer This important addition to the Architecture Briefs series is based on the author's design writing courses at New York University and the School of Visual Arts Lange also writes a popular online column for Design Observer and has written for Dwell Metropolis New York magazine and The New York Times Writing About Architecture includes analysis of critical writings by Ada Louise Huxtable Lewis Mumford Herbert Muschamp Michael Sorkin Charles Moore Frederick Law Olmsted and Jane Jacobs Architects covered include Marcel Breuer Diller Scofidio Renfro Field Operations Norman Foster Frank Gehry Frederick Law Olmsted SOM Louis Sullivan and Frank Lloyd Wright

Material Balance Ingrid Paoletti, Massimiliano Nistri, 2020-09-30 This book argues that we are living in an era of deep mutation and the anthropocentric model no longer fits our way of living and behaving on Earth Climate change is upsetting our relationship with nature and the environment while artificial intelligence scenarios undermine the foundations of human life As the pressure to re-align based on new modes of living and consuming increases the first priority should be to address the way we imagine design produce and construct our built environment The highly original book explores how the relation between design technology and material cultures can underpin and drive this change It discusses the need for a new material balance to develop our design practice not only from an energy and environmental perspective but also from a physiological cultural and semantic one in order to re-balance the impact of material design on society This publication is an excellent guide to understanding in detail the theoretical framing of several crucial topics in material balance design from computational knitting to material agency and from new acoustic ecology to future fade technologies bio-based design and ultimately non-anthropocentric habitats offering insights into preferable future scenarios

Design for Health Arif Hasan, Christian Benimana, Mette Ramsgaard Thomsen, Martin Tamke, 2023-09-12 The book provides new perspectives from leading researchers accentuating and examining the central role of the built environment in conceiving and implementing multifaceted solutions to the complex challenges of physical and mental health revealing critical potentials for architecture and design to contribute in more informed and long-term ways to the urgent transition of our society The volume book offers a compilation of peer-reviewed papers that uniquely connects knowledge and criticality broadly across practice and academia from new technologies theories and methods to community engaged practice on many scales and more The book is part of a series of six volumes that explore the agency of the built environment in relation to the SDGs through new research conducted by leading researchers The series is led by editors Mette Ramsgaard Thomsen and Martin Tamke in collaboration with the theme editors Design for Climate Adaptation Billie Faircloth and Maibritt Pedersen Zari Design for Rethinking Resources Carlo Ratti and Mette Ramsgaard Thomsen Eds Design for Resilient Communities Anna Rubbo and Juan Du Eds Design for Health Arif Hasan and Christian Benimana Eds Design for Inclusivity Magda Mostafa and Ruth Baumeister Eds Design for Partnerships for

Change Sandi Hilal and Merve Bedir Eds **Philosophy for Architects** Branko Mitrovic, 2012-03-20 Philosophy for Architects is an engaging and easy to grasp introduction to philosophical questions of interest to students of architectural theory Topics include Aristotle s theories of visual imagination and their relevance to digital design the problem of optical correction as explored by Plato Hegel s theory of zeitgeist and Kant s examinations of space and aesthetics among others Focusing primarily on nineteenth and twentieth century philosophy it provides students with a wider perspective concerning philosophical problems that come up in contemporary architectural debates *Ethics for Architects* Thomas Fisher, 2012-03-20 In this new Architecture Brief Ethics for Architects Thomas Fisher presents fifty case studies representing a broad range of ethical dilemmas facing today s architects from questions regarding which clients to work for to the moral imperatives of reclaiming building materials for construction instead of sending them to landfills This timely book features newly relevant interpretations adapted to the pervasive demands of globalization sustainability and developments in information technology Fisher s analysis of architecture s thorniest ethical issues are written in a style that is accessible to the amateur philosopher and appealing to professional architects and students alike Thought provoking and essential Ethics for Architects is required reading for any designer who wants to work responsibly in today s complex world
