Pathogens Crossing Borders Cornelia Knab, 2022-07-29 The increasing globalization of trade travel and transport since the mid 19th century had unwelcome consequences one of them was the spread of contagious animal diseases over greater distances in a shorter time than ever before Borders and national control strategies proved to be insufficient to stop the pathogens Not surprisingly the issue of epizootics epidemics of animals was among the first topics to be addressed by international meetings from the 1860s onwards Pathogens Crossing Borders explores the history of international efforts to contain and prevent the spread of animal diseases from the early 1860s to the years after the Second World War As an innovative contribution to global history and the history of internationalism the book investigates how disease experts politicians and state authorities developed concepts practices and institutional structures at the international level to tackle the spread of animal diseases across borders By following their activities in dealing with a problem area which was and is today of enormous political social public health and economic relevance the book reveals the historical challenges of finding common international responses to complex and pressing global issues for which there are no easy solutions

The Contestation of Expertise in the European Union Vigjilenca Abazi, Johan Adriaensen, Thomas Christiansen, 2020-11-16 This book examines the position and role of expertise in European policy making and governance At a time when the very notion of expertise and expert advice is increasingly losing authority the book addresses these challenges by empirically examining specific administrative processes and institutional designs in the European Union The first part of the volume theorizes expertise and its contestation by examining accounts of the legitimate institutional design of knowledge production processes and exploring the theoretical links of Europeanisation and expertise The second part of the book delves into empirical institutionalist accounts of expertise and maps the role of experts in a variety of EU institutions but also explains the implications when EU bodies themselves are in an expert position such as agencies The book offers insights into how individual experts deal with the challenge of producing reports that will be heard by policy makers while at the same time preserving their independence Broadening its scope the book then expands the analysis to the role of advisory committees in light of the shift from a reliance primarily on in house expertise to including more external experts in advisory groups in the European Commission and European Parliament as well as at the European External Action In the third part the book opens the lens to developments beyond the EU by taking into account two highly pertinent fields climate change and trade These fields are highly complex fast developing and politicised issues and the book engages with them in order to provide an outside in perspective on expertise Chapter 6 is available open access under a Creative Commons Attribution 4 0

The Cambridge History of the European Union: Volume 1, European Integration Outside-In Mathieu Segers, Steven Van Hecke, 2023-11-09 Volume I examines the history of the European Union from an outside in perspective asking the following questions how does the European Union look from the outside and which outside forces shaped and guided the process of European integration Split into three parts the first addresses the main external events that have steered the European integration process with emphasis placed on critical junctures following the Second World War such as the division and reunification of Germany and the Eastern enlargement Part II considers the various international trends that have shaped European integration with particular focus on globalisation and geopolitics While the first two parts pay special attention to institutions countries international organisations and the main actors Part III focuses on the role of ideas networks public opinion and memory that influenced the development of the European Union

Europe in the Long Twentieth Century Christoph Cornelissen, 2024-10-08 Thanks to their economic and military strength the European empires had achieved global supremacy by 1900 with large parts of the world under their dominance in the wake of colonial expansion This situation fuelled ideas of Europe's permanent almost natural global superiority especially among the middle classes However as early as the First World War such claims came under increasing pressure This volume explains the role played by modern nationalism and anti imperial movements the competition between different political orders changes in the economy and society and the great ideas and utopias Their interplay gave rise to enormously destructive forces in Europe From the Boer and Balkan wars before 1914 to the Yugoslav wars of the 1990s and the Ukraine war since 2022 they have produced a continuum of violence At the same time the great promise of political participation and social security is one of the constants of Europe's history in the long twentieth century Against this backdrop modern societies emerged whose values had moved far away from the older models Perceptions of the role of the sexes families and generations changed fundamentally In addition the major internal European migrations together with the global immigration that became increasingly significant after 1945 ensured that the ethnic profile of European societies changed considerably Europe in the Long Twentieth Century shows how on the one hand these different factors led to a Europeanisation of living

and working conditions and at the same time how the political and economic integration of the countries of Europe progressed On the other hand it demonstrates how Europe s role in the global context changed fundamentally As much as the geopolitical provincialisation of Europe continued unabated Europeans were constantly searching for new ways to assert themselves throughout the long twentieth century The search continues
