Before the Storm A. H. Hay, 2020-12-03 We build infrastructure and everything else for a purpose which enables a service activity or capability All infrastructure has a purpose When we protect against harm it is the purpose that we are protecting When we know how to protect that purpose we know what we require of our infrastructure and can incorporate

our protection approach and measures directly into the design When protection is inherent to the design of a system it is inherent to the service activity or capability This more closely reflects how people behave and is more efficient than imposing security measures on system design Protection and resilience go hand in hand with the same foundation in risk analysis When we understand this relationship we can forecast protection requirements over the life of the capability and design accordingly We can protect against the unknown by focusing on how failure affects the operations that we can control Join Marianne as she builds on her developing understanding of infrastructure risk and resilience and explores the protection and security of assets and capabilities encounters diverse perspectives and learns the meaning of social licence The threats she faces are not only project based and she must deal with real world challenges from colleagues and clients Through her journey we learn the value of evidence based planning focusing on those aspects that we can control and spending the time to really understand why as much as what is being protected Before the Storm builds on the principles and concepts introduced in After the Flood It is a clear and engaging exploration of protection planning for students industry practitioners or anyone interested in infrastructure business continuity security integration and emergency and risk management

21st Century Security and CPTED Randall I. Atlas, 2013-06-25 The concept of Crime Prevention Through Environmental Design CPTED has undergone dramatic changes over the last several decades since C Ray Jeffery coined the term in the early 1970s and Tim Crowe wrote the first CPTED applications book The second edition of 21st Century Security and CPTED includes the latest theory knowledge and practice of

Contested Spaces: Abortion Clinics, Women's Shelters and Hospitals Lori A. Brown, 2016-05-13 In this book Lori Brown examines the relationship between space defined physically legally and legislatively and how these factors directly impact the spaces of abortion It analyzes how various political entities shape the physical landscapes of inclusion and exclusion to reproductive healthcare access and questions what architecture's responsibilities are in respect to this spatial conflict Employing writing drawing and mapping methodologies this interdisciplinary project explores restrictions and legislatures which directly influence abortion policy in the US Mexico and Canada It questions how these legal rulings produce spatial complexities and why architecture isn't more culturally and spatially engaged with these spaces In Mexico where abortion is fully legal only in Mexico City during the first trimester women must travel vast distances and undergo extreme conditions in order to access the procedure Conservative state governments continue to make abortion a severely punishable crime In Canada there are nowhere near the cultural and religious stigmas to abortion as in the US and Mexico Completely legal and without restrictions Canada offers an important contrast to the ongoing abortion issues within the US and Mexico Researching the spatial implications of such a politicized space this book expands beyond a study of abortion clinic and includes other spaces such as women's shelters and hospitals that require multiple levels of secured spaces in order to discuss the spatial ramifications of access and security within spaces that are highly personal private and sometimes secret or even hidden In questioning what architecture's

responsibility is in these spatial conflicts the book looks at how what architecture does can be used to reconsider the spaces and security around such contested places and ultimately suggests what design's potential impact might be In doing so it shows how architecture's role might be redefined within social and spatial practices
