Asd Unlocking Language Marion Blank, Suzanne Goh, 2013-12 What is ASD Unlocking Language and what can it accomplish ASD Unlocking Language is a program designed to teach effective language and communication to children with autism spectrum disorders and other developmental conditions that affect language Upon successful completion of the program children are able to understand and talk about past present and future events in their home life such as eating playing bathing and dressing past present and future events in the outside world such as visits to the supermarket a trip to the zoo and activities at school simple stories and other early literacy skills Mastery of these skills enables children to become more active participants in the world around them The program may be implemented by a parent teacher therapist or other dedicated adult Who is the program for The program is for children who meet the following criteria In language the ability to say at least two words in sequence either spontaneously or through imitation such as go home bye bye want cookie While behaviors like these are fragmentary they are significant indicators that the child has the perceptual and motor base required for spoken language In behavior the willingness to respond effectively to adult guidance To benefit from language instruction a child must be able to cooperate in the teaching process If a foundation of cooperation is not yet present it can be established through the behavioral program outlined in *Spectacular Bond Reaching the Child with Autism* by Dr Marion Blank Dr Suzanne Goh and Susan Deland It is advisable to postpone ASD Unlocking Language until the *Spectacular Bond* program has been completed How is the program organized ASD Unlocking Language is organized into short daily sessions lasting about 20 to 30 minutes each Sessions take place once per day four or five days per week Skills taught in the lessons are also practiced outside the session in real world settings Depending on the child s skill and rate of progress the full program takes from 6 to 18 months to complete There are two components to the program Pre Language Skills and Language Skills

Asd Pre-Speaking Program Marion Blank, Suzanne Goh, 2014-02-10 ASD Pre Speaking Program is designed to teach a range of cognitive and linguistic skills to non verbal children with autism spectrum disorders and other developmental conditions that interfere with language development Note The term non verbal is often misleading since many of the children can comprehend and incorporate language A more accurate term would be non speaking Upon successful completion of the program children are able to attend to directions guidance and input from adults sustain attention to cognitive demands for periods up to 15 to 20 minutes gain the ability to retain increasingly complex sequences of

visual information comprehend and respond to increasingly complex language based demands ASD Pre Speaking may be implemented by a parent teacher therapist or other dedicated adult ASD Pre Speaking is organized into short daily sessions lasting about 15 to 20 minutes each Sessions take place once per day four or five days per week Skills taught in the lessons are also practiced outside the session in real world settings Depending on the child's skill and rate of progress the full program takes from 2 to 6 months to complete Four activities are used with each aimed at fostering attention sequencing memory and language Each activity starts with processing one piece of information e.g. matching one picture to another and then moves steadily so that the child is incorporating reviewing and acting upon four pieces of information e.g. having seen four pictures that are no longer in view the child selects via memory four pictures that match the originals NOTE This program is also included as part of ASD Unlocking Language
