## Using the Controls

### Power

This front panel button will manually switch the AMP Three on or off. A multi-colored LED indicates its power status. To use the *Auto On* feature, leave this front panel switch in the on position.

### Speaker Selector

The AMP Three has two pairs of speaker outputs. Press button *A* to activate the *A* outputs. Press button *B* to activate the *B* outputs. Both *A* and *B* outputs may be used simultaneously provided the combined impedance does not fall below 2 ohms.

*Note: Before pressing either of the speaker selector buttons, be sure that the level controls are set at the minimum position.*

### Input Level Controls

These knobs adjust the incoming signal level and thereby act as volume controls. We recommend that these be set to *max* and your signal source (receiver, CD player, preamplifier, etc.) be used to adjust the volume.
