Ethics and Electronic Information Barbara Rockenbach, Tom Mendina, 2015-10-03 Stephen Almagno's career as a professor of library science began at the University of Pittsburgh in 1971. In 1990 he became the first professor in the United States to teach an information ethics course in a library and information science program. Almagno's work in the area of information ethics was recognized at the 2001 Ethics of Electronic Information in the 21st Century symposium held at the University of Memphis on October 18-21, 2001 upon the occasion of his retirement from the University of Pittsburgh. The essays in this book were presented at the symposium honoring Almagno. The first section of the book features papers that pay special tribute to Almagno. The second contains papers on library issues and ethics such as the ethics of electronic information in China and eastern Europe, the organizations that represent information professionals, the ethics of user privacy in the digital library, and ethical implications of e-commerce to name just a few. The third section covers topical issues such as Internet plagiarism, ethical hacking, and the security justification, social democracy, and information media policy, and the ethics of dialogue among others.

Engineering Your Future Stuart G. Walesh, 2012-03-06 Round out your technical engineering abilities with the business know-how you need to succeed. Technical competency, the hard side of engineering and other technical professions, is necessary but not sufficient for success in business. Young engineers must also develop nontechnical or soft side competencies like communication, marketing, ethics, business accounting, and law and management in order to fully realize their potential in the workplace. This updated edition of *Engineering Your Future* is the go-to resource on the nontechnical aspects of professional practice for engineering students and young technical professionals alike. The content is explicitly linked to current efforts in the reform of engineering education, including ABET's Engineering Criteria 2000, ASCE's Body of Knowledge, and those being undertaken by AAEE, AIChE, and ASME. The book treats essential nontechnical topics you'll encounter in your career, like self-management, interpersonal relationships, teamwork, project and total quality management, design, construction, manufacturing, engineering economics, organizational structures, business accounting, and much more. Features new to this revised edition include: A stronger emphasis on management and leadership. A focus on personal growth and developing relationships. Expanded treatment of project management. Coverage of how to develop a quality culture and ways to encourage creative and innovative thinking. A discussion of how the results of design, the root of engineering, come to fruition in constructing and manufacturing, the fruit of engineering. New information on accounting principles that can be used in your career-long financial planning. An in-depth treatment of how engineering students and young practitioners can and should anticipate, participate in, and ultimately effect change. If you're a student or young practitioner starting your engineering career, *Engineering Your Future* is essential reading.

The Idea of Tradition in the Late Modern World Thomas Albert Howard, 2020-02-10 Our late modern era is marked by the rapidity of change, waxing pluralism, focus on the future not the past, the elevation of personal choice over communal obligation, and for some, a sense of

spiritual and intellectual disorientation that can lead to resentment fear nostalgia and or a disordered desire for absolute certainty and rigid authority How can religious traditions be maintained and even thrive in such an environment How do they negotiate the fluidity of it all and transmit their beliefs and practices to future generations What should be the role of academic authorities vis vis religious authorities in this process Finally what can different religious traditions learn from one another on the general topic of tradition This volume invites readers to participate in a candid ecumenical and interreligious conversation involving Christian Jewish and Muslim voices The editor and contributors alike contend that the Abrahamic faiths while having honest differences face common challenges from contemporary culture which often fosters incomprehension about the depth breadth and intellectual rigor of religious traditions At the same time traditions can become disengaged and moribund without attending to them with careful reflection discernment and conversation with others who hold different points of view With contributions from David Novak James L Heft S M David Bentley Hart Ebrahim Moosa Sarah Hinlicky Wilson *Don DeLillo after the Millennium* Jacqueline A. Zubeck,2020-07-06 Don DeLillo after the Millennium Currents and Currencies examines all the author s work published in the 21st century The Body Artist Cosmopolis Falling Man Point Omega and Zero K the plays Love Lies Bleeding and The Word for Snow and the short stories in The Angel Esmeralda What topic doesn t DeLillo tackle Cyber capital and currency markets ontology and intelligence global warming and cryogenics Don DeLillo continues to ponder the significance of present cultural currents and to anticipate the waves of the future Performance art and ethics drama and euthanasia space studies and the constrictions of time DeLillo perspicaciously reads our culture giving voice to the rhythms of our vernacular and diction Rich and resonant his work is so multifaceted in its attention that it accommodates a wide variety of critical approaches while its fine and filigreed prose commends him to a poetic appreciation as well Don DeLillo after the Millennium brings together an international cast of scholars who examine DeLillo s work from many critical perspectives exploring the astonishing output of an author who continues to tell our stories and show us ourselves Historical Dictionary of Chile Salvatore Bizzarro,2017-02-13 This two volume Historical Dictionary of Chile covers the economy and the environment political parties and history and reprehensible period of dictatorship during a crucial time in Chile s history The end of the iron fist rule of Augusto Pinochet who ruled from 1973 until 1990 however allowed a return to democratic rule and the country kept searching for coherence and unity in national life among diverse and often discordant elements This fourth edition of Historical Dictionary of Chile contains a chronology an introduction and an extensive bibliography The dictionary section has over 700 cross referenced entries on important personalities politics economy foreign relations religion and culture This book is an excellent access point for students researchers and anyone wanting to know more about Chile **The Lure of Images** David Morgan,2020-08-26 This is the history of the relationship between mass produced visual media and religion in the United States It is a journey from the 1780s to the present from early evangelical tracts to teenage witches and televangelists

and from illustrated books to contemporary cinema David Morgan explores the cultural marketplace of public representation showing how American religionists have made special use of visual media to instruct the public to practice devotion and ritual and to form children and converts Examples include studying Jesus as an American idol Jewish kitchens and Christian Parlors Billy Sunday and Buffy the Vampire Slayer Uncle Tom's Cabin and the anti slavery movement This unique perspective reveals the importance of visual media to the construction and practice of sectarian and national community in a nation of immigrants old and new and the tensions between the assimilation and the preservation of ethnic and racial identities As well as the contribution of visual media to the religious life of Christians and Jews Morgan shows how images have informed the perceptions and practices of other religions in America including New Age Buddhist and Hindu spirituality and Mormonism Native American Religions and the Occult

The Living Church, 1962 **Journalism's Roving Eye** John Maxwell Hamilton, 2011-08-15

In all of journalism nowhere are the stakes higher than in foreign news gathering For media owners it is the most difficult type of reporting to finance for editors the hardest to oversee Correspondents roaming large swaths of the planet must acquire expertise that home based reporters take for granted facility with the local language for instance or an understanding of local cultures Adding further to the challenges they must put news of the world in context for an audience with little experience and often limited interest in foreign affairs a task made all the more daunting because of the consequence to national security In *Journalism's Roving Eye* John Maxwell Hamilton a historian and former foreign correspondent provides a sweeping and definitive history of American foreign news reporting from its inception to the present day and chronicles the economic and technological advances that have influenced overseas coverage as well as the cavalcade of colorful personalities who shaped readers perceptions of the world across two centuries From the colonial era when newspaper printers hustled down to wharfs to collect mail and periodicals from incoming ships to the ongoing multimedia press coverage of the Iraq War Hamilton explores journalism's constant and not always successful efforts at dishing the foreign news as James Gordon Bennett put it in the mid nineteenth century to describe his approach in the New York Herald He details the highly partisan coverage of the French Revolution the early emergence of special correspondents and the challenges of organizing their efforts the profound impact of the non yellow press in the run up to the Spanish American War the increasingly sophisticated machinery of propaganda and censorship that surfaced during World War I and the golden age of foreign correspondence during the interwar period when outlets for foreign news swelled and a large number of experienced independent journalists circled the globe From the Nazis intimidation of reporters to the ways in which American popular opinion shaped coverage of Communist revolution and the Vietnam War Hamilton covers every aspect of delivering foreign news to American doorsteps Along the way Hamilton singles out a fascinating cast of characters among them Victor Lawson the overlooked proprietor of the Chicago Daily News who pioneered the concept of a foreign news service geared to American interests Henry Morton Stanley one of the first reporters to generate news on his own with

his 1871 expedition to East Africa to find Livingstone and Jack Belden a forgotten brooding figure who exemplified the best in combat reporting Hamilton details the experiences of correspondents editors owners publishers and network executives as well as the political leaders who made the news and the technicians who invented ways to transmit it Their stories bring the narrative to life in arresting detail and make this an indispensable book for anyone wanting to understand the evolution of foreign news gathering Amid the steep drop in the number of correspondents stationed abroad and the recent decline of the newspaper industry many fear that foreign reporting will soon no longer exist But as Hamilton shows in this magisterial work traditional correspondence survives alongside a new type of reporting Journalism s Roving Eye offers a keen understanding of the vicissitudes in foreign news an understanding imperative to better seeing what lies ahead *Handbook of Latin American Literature (Routledge Revivals)* David Foster, 2015-06-11 First published in 1987 this second edition in 1992 the Handbook of Latin American Literature offers readers the opportunity to explore this literary history in the English Language and constitutes an ideological approach to Latin American Literature It provides both concise information concerning particular authors works and literary traditions of Latin America as well as comprehensive material about the various national literatures of the area This book will therefore be of interest to Hispanic scholars as well as more general readers and non Hispanists *As Affecting the Fate of My Absent Husband* Jane Franklin, 2009 The tragic fate of the lost Franklin expedition 1845 48 is a well known part of exploration history but there has always been a gap in the story a personal account that begs to be told This text is a collection of poignant letters of Sir John Franklin s wife Jane providing a personal perspective on the tragedy
