Barriers Opportunities 2 Year 4 Year Degrees:

Barriers and Opportunities for 2-Year and 4-Year STEM Degrees National Academies of Sciences, Engineering, and Medicine, National Academy of Engineering, Policy and Global Affairs, Board on Higher Education and Workforce, Division of Behavioral and Social Sciences and Education, Board on Science Education, Committee on Barriers and Opportunities in Completing 2-Year and 4-Year STEM Degrees, 2016-06-18 Nearly 40 percent of the students entering 2 and 4 year postsecondary institutions indicated their intention to major in science technology engineering and mathematics STEM in 2012 But the barriers to students realizing their ambitions are reflected in the fact that about half of those with the intention to earn a STEM bachelor s degree and more than two thirds intending to earn a STEM associate s degree fail to earn these degrees 4 to 6 years after their initial enrollment Many of those who do obtain a degree take longer than the advertised length of the programs thus raising the cost of their education Are the STEM educational pathways any less efficient than for other fields of study How might the losses be stemmed and greater efficiencies realized These questions and others are at the heart of this study *Barriers and Opportunities for 2 Year and 4 Year STEM Degrees* reviews research on the roles that people processes and institutions play in 2 and 4 year STEM degree production This study pays special attention to the factors that influence students decisions to enter stay in or leave STEM majors quality of instruction grading policies course sequences undergraduate learning environments student supports co curricular activities students general academic preparedness and competence in science family background and governmental and institutional policies that affect STEM educational pathways Because many students do not take the traditional 4 year path to a STEM undergraduate degree *Barriers and Opportunities* describes several other common pathways and also reviews what happens to those who do not complete the journey to a degree This book describes the major changes in student demographics how students view value and utilize programs of higher education and how institutions can adapt to support successful student outcomes In doing so *Barriers and Opportunities* questions whether definitions and characteristics of what constitutes success in STEM should change As this book explores these issues it identifies where further research is needed to build a system that works for all students who aspire to STEM degrees The conclusions of this report lay out the steps that faculty STEM departments colleges and universities professional societies and others can take to improve STEM education for all students interested in a STEM degree

Handbook of Research on Teachers of Color and Indigenous Teachers Conra D. Gist, Travis J. Bristol, 2022-10-15 Teachers of Color and Indigenous Teachers are underrepresented in public schools across the United States of America with Black Indigenous and People of Color making up roughly 37% of the adult population and 50% of children but just 19% of the teaching force Yet research over decades has indicated their positive impact on student learning and social and emotional development particularly for Students of Color and Indigenous Students A first of its kind the *Handbook of Research on Teachers of Color and Indigenous Teachers* addresses key issues and obstacles to ethnoracial

diversity across the life course of teachers careers such as recruitment and retention professional development and the role of minority serving institutions Including chapters from leading researchers and policy makers the Handbook is designed to be an important resource to help bridge the gap between scholars practitioners and policy makers In doing so this research will serve as a launching pad for discussion and change at this critical moment in our country s history The volume s goal is to drive conversations around the issue of ethnoracial teacher diversity and to provide concrete practices for policy makers and practitioners to enable them to make evidence based decisions for supporting an ethnoracially diverse educator workforce now and in the future

Indicators for Monitoring Undergraduate STEM Education National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Science Education, Committee on Developing Indicators for Undergraduate STEM Education, 2018-04-08 Science technology engineering and mathematics STEM professionals generate a stream of scientific discoveries and technological innovations that fuel job creation and national economic growth Ensuring a robust supply of these professionals is critical for sustaining growth and creating jobs growth at a time of intense global competition Undergraduate STEM education prepares the STEM professionals of today and those of tomorrow while also helping all students develop knowledge and skills they can draw on in a variety of occupations and as individual citizens However many capable students intending to major in STEM later switch to another field or drop out of higher education altogether partly because of documented weaknesses in STEM teaching learning and student supports Improving undergraduate STEM education to address these weaknesses is a national imperative Many initiatives are now underway to improve the quality of undergraduate STEM teaching and learning Some focus on the national level others involve multi institution collaborations and others take place on individual campuses At present however policymakers and the public do not know whether these various initiatives are accomplishing their goals and leading to nationwide improvement in undergraduate STEM education Indicators for Monitoring Undergraduate STEM Education outlines a framework and a set of indicators that document the status and quality of undergraduate STEM education at the national level over multiple years It also indicates areas where additional research is needed in order to develop appropriate measures This publication will be valuable to government agencies that make investments in higher education institutions of higher education private funders of higher education programs and industry stakeholders It will also be of interest to researchers who study higher education

Breaking Through the Access Barrier Edward P. St. John, Shouping Hu, Amy S. Fisher, 2010-10-18 This book argues that the policies designed to address inequalities in college access are failing to address underlying issues of inequality Breaking Through the Access Barrier introduces a groundbreaking new theory academic capital formation ACF to promote improvement in academic preparation college information and student aid

Hispanics and the Future of America National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Population, Panel on Hispanics in the United States, 2006-03-23 Hispanics and the Future of America presents details of the complex story of a population that varies in many dimensions including national origin immigration status and generation The papers in this volume draw on a wide variety of data sources to describe the contours of this population from the perspectives of history demography geography education family employment economic well being health and political engagement They provide a rich source of information for researchers policy makers and others who want to better understand the fast growing and diverse population that we call Hispanic The current period is a critical one for getting a better understanding of how Hispanics are being shaped by the U S experience This will in turn affect the United States and the contours of the Hispanic future remain uncertain The uncertainties include such issues as whether Hispanics especially immigrants improve their educational attainment and fluency in English and thereby improve their economic position whether growing numbers of foreign born Hispanics become citizens and achieve empowerment at the ballot box and through elected office whether impending health problems are successfully averted and whether Hispanics geographic dispersal accelerates their spatial and social integration The papers in this volume provide invaluable information to explore these issues

Apprentice Nation Ryan Craig, 2023-11-07 College isn't for everyone It's time to challenge the status quo and embrace the potential of apprenticeships in tech healthcare finance and more which can provide a sustainable pathway to economic opportunity For decades college has been the only respectable way to access the world of work despite paralyzing tuition and a dire lack of practical skills that has left 40 percent of college graduates underemployed unfulfilled and struggling to repay student loan debt Education and workforce expert Ryan Craig explores how a modern apprenticeship system will allow students and job seekers to jump start their careers by learning while they earn ultimately leading to greater workforce diversity and geographic mobility With a deep dive into the history behind America's outdated college system Craig reveals The origins of the student debt crises and admissions scandals Why apprenticeships are an effective pathway to career opportunity What America can do to catch up with other nations making apprenticeship opportunities broadly available Where students and job seekers can go to land an apprenticeship Featuring a directory of US apprenticeship programs by industry and location Apprentice Nation is an accessible blueprint for a country where young Americans of all backgrounds can launch careers in a variety of in demand fields With just a few common sense changes to education and workforce development an apprentice nation will put the American Dream within reach for everyone

New Developments in Pathways Towards Diversity and Inclusion in STEM: A United States Perspective Alexander Gates, Juan Gilbert, Chris Botanga, Kim Nguyen, Bonita London, 2022-10-17 The Louis Stokes Alliances for Minority Participation LSAMP program of the US National Science Foundation has been a primary force for raising the success and graduation of minority students in STEM for 30 years Increasing the number of underrepresented students earning baccalaureate degrees and

entering graduate school in STEM is the goal of LSAMP. This goal has been nearly achieved through the formation of alliances of degree granting institutions of higher learning varying from community colleges to major research institutions. Currently there are 59 alliances including more than 400 institutions. LSAMP is responsible for more than 650,000 bachelor's degrees earned by minority students in STEM. The papers for this Research Topic should focus on the use of LSAMP activities, programs, and collaborations to develop pathways to success and graduation of STEM majors from minority groups that are underrepresented in STEM. These pathways can include any segment from pre-college through graduate school. Areas of special interest include mentoring, research experiences, transitions between levels, and novel approaches for retention. The studies should be research based and rigorous. They can be pure research, studies, curriculum and design, or literature reviews, but they must be at a cutting edge level and be subject to detailed review and assessment. **Higher Education**
