Robinson,Dennis Strachota,James A. Hough,2017-09-19 Budgeting for Local Governments and Communities is designed as the primary textbook for a quarter or semester long course in public budgeting and finance in an MPA programme Many currently available texts for this course suffer from a combination of defects that include a focus on federal and state budgeting a lack of a theoretical governance framework an omission of important topics and typically a lack of exercises and datasets for student use Budgeting for Local Governments and Communities solves all of these problems The book is exceptionally comprehensive and well written and represents the efforts of veteran authors with both teaching and real world experience Key Features Special Focus on Local Government Budgeting focuses exclusively on budgeting at the local levels of American government which are responsible for spending 40 percent of the taxes collected from citizens Integration of Theory and Practice teaching cases and chapters capture the lessons learned by professional practitioners who have extensive experience in making local public budgeting work on the ground Polity Approach to Local Budgeting presents an introduction to local budgeting as the central political activity that integrates the resources of the community into a unified whole Budgeting is presented as governance work rather than as a unique set of skills possessed by analysts and financial specialists Legal Historical Economic and Moral Foundations of Local Government Budgeting provides readers with an understanding of how the structures and processes of local budgeting systems are firmly tethered to the underlying core values legal principles and historical development of the larger American federal state and local political systems Electronic Datasets and Budgeting Exercises the text includes access to extensive electronic datasets and practice exercises that provide abundant opportunities for students to learn through doing Extensive Glossary and Bibliography covers terms on the history and practice of local public budgeting [Public Budgeting in Search for an Identity](#) Maria Francesca Sicilia,Ileana Steccolini,2020-12-27 Public Budgeting in Search for an Identity State of the Art and Future Challenges provides a state of the art reflection on current trends in international public budgeting representing an important pillar in the accumulation of knowledge on public sector budgeting processes contents evolutions and critical issues Budgeting is central in public sector organizations It performs a complex variety of functions being the arena where multiple actors cultures and professional identities interact making it an extremely fascinating field and topic of investigation There is a significant need and scope for exploring budgeting processes in the public sector today as a

consequence of the managerial waves of reforms that have taken place over the last few decades and the implementation of austerity programmes as well as in light of current trends including emerging challenges related to community care and wellbeing rising inequality people flows climate change pandemics and the persistence of democratic deficits The chapters in this volume address critical issues on this broad topic offering new perspectives on current evolutions in public budgeting including among others participatory budgeting performance budgeting the budgetary slack resources and the need to ensure balance between budget control and flexibility These contributions show that public budgeting can and must remain the subject of enduring interest in our studies The chapters in this book were originally published as a special issue of Public Management Review
