Lynch, 2017-09-25 Revenue and expenditure forecasting plays an important role in public budgeting and financial management particularly during times of financial constraint when citizens impose greater accountability upon government to use taxpayer dollars more efficiently Despite its significance revenue and expenditure forecasting is often overlooked in the budget process and there is an imbalance between practice and research in this area Based on the collaboration of budget scholars and practitioners Government Budget Forecasting fulfills two purposes Enhances the understanding of revenue and expenditure estimation both theoretically and practically Stimulates dialogue and debate among practitioners and academicians to identify good forecast practices as well as areas for improvement Divided into four parts this comprehensive reference first examines forecast practices at the federal state and local levels drawing on case studies that include California Texas and Louisiana It then explores consensus systems and risk assessment considering political factors and the costs of forecast errors The text concludes with a call to transparency and guidance from a code of ethics and a look at forecasting practices in emerging countries

Budgetary Forecasting in Local Government Howard A. Frank, 1993-11-23 Local governments are hard pressed to balance their budgets in the 1990s Part of any budget balancing effort is accurate forecasting In this new work Howard Frank introduces time tested forecasting techniques from the private sector and military in a local forecasting environment In a lucid user friendly treatment Frank shows how simple and complex methods can be put to use in the contemporary local government setting Through examples many of them from his own research the author delineates the strengths and weaknesses of quantitative and non quantitative forecasting methods Frank also shows how these techniques can be used to monitor changes in public programs an increasingly important part of contemporary budget execution Frank does not assume an extensive mathematical or statistical background on the part of the reader indeed a forecast neophyte will have no difficulty understanding the text Questions at the end of each chapter focus the reader on the major concepts and provide insights on practical applications within the urban setting A cornerstone of the work is that local forecasters must be intelligent experimenters with the new tools there is no canned advice that applies to all cities and forecast situations But with application of forecasting approaches treated in this unique work local budgeters and those in training to become budgeters will be able to adopt forecasting approaches that have been underutilized in local government

Local Government Budgeting Gerasimos A. Gianakis, Clifford McCue, 1999-01-30

In an effort to bridge the gap between budget theorists and practitioners this book approaches local government budgeting as the internal resource allocation process of a highly differentiated organization that operates in a very political environment and whose boundaries are particularly permeable during the formal budget process Written by academics with extensive practical experience in local government budgeting and finance this text will be equally useful to practitioners scholars and students Theory building in public budgeting has been dominated by political science and economics and these approaches have not produced theories that can serve as guides to action for practitioners or help them understand their action environments In order to produce theory that has meaning for practitioners researchers should approach the subject as it is experienced by practitioners The long term financial health of local governments requires an integrated approach to public budgeting This book develops theory that illuminates practice It recognizes that the budget process is the only organization wide process that integrates all of the agencies that comprise the government and thus the budget must address the long term consequences of any action The budget process itself is presented as a vehicle to develop the decision premises and organizational values that will support allocative efficiency and productivity
