
APES Pollution Questions with correct Answers 2024

Troposphere - answer The atmospheric layer closest to the earth's surface. Contains 75-80% of the earth's air mass and extends 11 miles about the earth's surface.

Stratosphere - answer The second layer in the atmosphere and extends 11-30 miles above the Earth and has a higher concentration of Ozone than the Troposphere.

How is Ozone produced? - answer When oxygen interacts with Ultraviolet radiation.

What does ozone protect us from? - answer Sunburn, cataracts, cancer of the skin and eyes, and damage to our immune system.

Air Pollution - answer Chemicals in the atmosphere in concentrations high enough to affect climate, health, and materials.

Where does air pollution come from? - answer Mostly from natural sources such as dust, plant decay and forest fires as well as burning fossil fuels.

Primary Pollutants - answer They enter directly into the troposphere. (soot and carbon monoxide)

Secondary Pollutants - answer They form when primary pollutants interact with one another or with the air to form new pollutants.

Carbon Dioxide - answer It warms the earth and contributes to global warming. Concentrations have increased due to the increase of burning of fossil fuels and deforestation.

Photochemical Smog - answer formed by the reaction of nitrogen oxides and volatile hydrocarbons under the influence of sunlight.

What does Photochemical smog do? - answer irritate the respiratory tract and damage crops and trees.

Where is photochemical smog? - answer It begins inside automobile engines and in the boilers of coal burning power plants. They are in cities in warm, dry, sunny areas.

Tague,2020-03-05 Gregory F Tague s *An Ape Ethic and the Question of Personhood* argues that great apes are moral individuals because they engage in a land ethic as ecosystem engineers to generate ecologically sustainable biomes for themselves and other species Tague shows that we need to recognize apes as eco engineers in order to save them and their habitats and that in so doing we will ultimately save earth s biosphere The book draws on extensive empirical research from the ecology and behavior of great apes and synthesizes past and current

understanding of the similarities in cognition social behavior and culture found in apes Importantly this book proposes that differences between humans and apes provide the foundation for the call to recognize forest personhood in the great apes While all ape species are alike in terms of cognition intelligence and behaviors there is a vital contrast unlike humans great apes are efficient ecological engineers Therefore simian forest sovereignty is critical to conservation efforts in controlling global warming and apes should be granted dominion over their tropical forests Weaving together philosophy biology socioecology and elements from eco psychology this book provides a glimmer of hope for future acknowledgment of the inherent ethic that ape species embody in their eco centered existence on this planet

The Enigmatic Realm of **Apes Pollution Study Guide Questions**: Unleashing the Language is Inner Magic

In a fast-paced digital era where connections and knowledge intertwine, the enigmatic realm of language reveals its inherent magic.
