5 mechanical properties and performance of materials - Jul 07 2023

web mechanical properties and performance of materials samples of engineering materials are subjected to a wide variety of mechanical tests to measure their strength elastic constants and other material properties as well as their performance under a variety of actual use conditions and environments

online materials information resource matweb - Aug 08 2023

web material property database with data sheets of thermoplastic and thermoset polymers such as nylon polycarbonate polyethylene metal alloys aluminum steel titanium nickel cobalt and zinc alloys ceramics lubricants free search tools

steel standards standards products standards publications - Mar 03 2023

web steel standards astm s steel standards are instrumental in classifying evaluating and specifying the material chemical mechanical and metallurgical properties of the different types of steels which are primarily used in the production of mechanical components industrial parts and construction elements as well as other accessories

engineering materials specifications and characteristics tables - Feb 19 2022

web material terms and definitions definitions related to engineering materials and metals metal melting temperatures melting point of a substance depends on pressure properties of metals thermal metals in general have high electrical conductivity high thermal conductivity and high density
