The Music and Dance of the World's Religions

E. Rust, 1996-08-23 Despite the world wide association of music and dance with religion this is the first full length study of the subject from a global perspective The work consists of 3 816 references divided among 37 chapters It covers tribal regional and global religions and such subjects as shamanism liturgical dance healing and the relationship of music mathematics and mysticism The referenced materials display such diverse approaches as analysis of music and dance description of context direct experience observation and speculation The references address topics from such disciplines as sociology anthropology history linguistics musicology ethnomusicology theology medicine semiotics and computer technology Chapter 1 consists of general references to religious music and dance The remaining 36 chapters are organized according to major geographical areas Most chapters begin with general reference works and bibliographies then continue with topics specific to the region or religion This book will be of use to anyone with an interest in music dance religion or culture

The Musical Order of the World Siglind Bruhn, 2005 In the disastrous years before and during the Second World War when confidence in a harmonious future was as difficult as it was crucial for spiritual survival two German artists in exile wrote what would become their late masterpieces The composer Paul Hindemith conceived an opera on the famous astronomer Johannes Kepler's mature life and theories The Harmony of the World the poet and novelist Hermann Hesse wrote a complex literary collage i The Glass Bead Game Both works address the topic of universal harmony in the fabric of creation and culture as well as the urgent problem of how such harmony can heal the spiritual mental and emotional developments of individuals and of society at large The two quests are mirrored into circumstances that are almost equidistant from the mid 20th century period in which their stories are being told Hindemith's opera centers on an outstanding intellectual in the late 16th and early 17th centuries while Hesse's work focuses on this intellectual's counterpart projected into a fictional world of the early 23rd century In both cases the quest for harmony and truthful proportion manifests at all levels of the stories told and of the works telling them Siglind Bruhn's thought provoking interdisciplinary study is organized along the lines of the seven areas in which scholars of the Pythagorean tradition from Plato to Kepler and beyond found universal harmony paradigmatically realized music arithmetic geometry and astronomy the quadrivium of the medieval liberal arts complemented by metaphysics psychology and art

An Introduction to Islamic Cosmological Doctrines Seyyed Hossein Nasr, 1993-01-01 This is the only book to deal with classical Islamic cosmology as it was formulated by the Ikhwan al Safa al Biruni and Ibn Sina during the tenth and eleventh centuries These figures influenced all the later centuries of Islamic history and in fact created the cosmological framework within which all later scientific activity in the Islamic world was carried out the enduring image of the cosmos within which Muslims have lived during the past millennium Nasr writes from within the Islamic tradition and demonstrates how based on the teachings of the

Quran and the Prophet the figures treated in this work integrated elements drawn from various ancient schools of philosophy and the sciences This book is unique in its treatment of classical Islamic cosmology as seen from within the Islamic world view and provides a key for understanding of traditional Islamic thought Back cover

Musicology of Religion Guy L. Beck, 2023-05-01 For generations religion and music have been regarded as universals yet despite the fact that they have been frequently linked throughout history and topography and despite the importance of music in the early stages of religious studies their combined presence has not until now been considered a separate area of study and research While there are well developed fields of anthropology of religion psychology of religion and philosophy of religion the widely recognized connections between religion and sound chant and music warrant comparable study Drawing upon theories and methods in the study of both religion and music referencing examples from world religious traditions and addressing challenges posed by critics this book envisions a unified field for religion and music musicology of religion Grounded in the scope and methods of phenomenology and comparative analysis musicology of religion represents an innovative direction in interdisciplinary study enriched by the social sciences ethnomusicology philosophy theology liturgical studies and cognitive studies As conceived musicology of religion will spearhead new and

creative paths in the study of religion **Listening, Thinking, Being** Lisbeth Lipari, 2015-12-07 Although listening is central to human interaction its importance is often ignored In the rush to speak and be heard it is easy to neglect listening and disregard its significance as a way of being with others and the world Drawing upon insights from phenomenology linguistics philosophy of communication and ethics *Listening Thinking Being* is both an invitation and an intervention meant to turn much of what readers know or think they know about language communication and listening inside out It is not about how to be a good listener or the numerous pitfalls that stem from the failure to listen Rather the purpose of the book is first to make readers aware of the value and importance of listening as a fundamental human ability inextricably connected with language and thought second to alert readers to the complexity of listening from personal cultural and philosophical perspectives and third to offer readers a way to think of listening as a mode of communicative action by which humans create and abide in the world Lisbeth Lipari brings together historical literary intercultural scientific musical and philosophical perspectives as well as a range of her own personal experiences to produce this highly readable analysis of how the human experience of being as an ethical relation with others is enacted by means of listening **Out of Time?** Elena Backhausen, Benjamin Wihstutz, Noa Winter, 2023-07-10 Out of Time has many different meanings amongst them outmoded out of step under time pressure no time left or simply delayed In the disability context it may also refer to resistant attitudes of living in crip time that contradict time as a linear process with a more or less predictable future According to Alison Kafer crip time bends the clock to meet disabled bodies and minds What does this mean in the disability arts What new concepts of accessibility crip futures and crip resistance can be staged or created by disability performance And how does the notion of out of time connect crip time with pandemic time in disability performance The collective volume seeks to respond to these questions by exploring crip time in disability performance as both a concept and a phenomenon The book tackles the topic from two angles on the one hand from a theoretical point of view that connects performance analysis with crip and performance theory on the other hand from a practice based perspective of disability artists who develop new concepts and dramaturgies of crip time based on their own lived experiences and observations in the field of the performing and disability arts The book gathers different types of text genres forms and styles that mirror the diversity of their authors Besides theoretical and academic chapters on disability performance the book also includes essays poems dramatic texts and choreographic concepts that reflect upon the alternative knowledge in the disability arts **The Need For a Sacred Science** Seyyed Hossein Nasr, 2005-08-12 The meaning of a science rooted in the sacred its contrast to modern science and its pertinence to us today *Sonic Theology* Guy L.
