

UNIT 8 : ECOLOGY

3.1 – Responses to the Environment

Explain how the behaviour and/or physiological response of an organism is related to changes in internal or external environment.

Organisms respond to changes in their environment through behavioural and physiological mechanisms.

- **Photoperiodism and phototropism in plants**
 - **photoperiodism** – response to amount of darkness and daylight
 - **phototropism** – response to light (bending/growing towards sunlight)
 - **gravitropism** – response to gravity (growing down into Earth)
 - **thigmotropism** – response to touch (ivy grows around a post)
- **Taxis and kinesis in animals**
 - **taxis** – movement towards or away stimulus
 - **phototaxis**(sunlight)
 - **chemotaxis**(chemical)
 - **geotaxis**(gravity)
 - **kinesis** – undirected movement in response to stimulus
 - **orthokinesis**(speed)
 - **kinkinesis**(turning)
- **Nocturnal and diurnal activity** – awake at day or night

Organisms exchange information with one another in response to internal changes and external cues, which can change behaviour.

- **Stimulus** – internal/external signals that involve a response
- Response to stimuli affects fitness
- Flight or fight response
- Predator warnings
- Insect responses to herbivory

Critical Care Study Guide Gerard J. Criner, Gilbert E.

D'Alonzo, 2013-03-09 Critical care medicine is a dynamic and exciting arena where complex pathophysiologic states requiring extensive knowledge and clinical acumen are commonly found. Caring for critically ill patients requires an extensive knowledge of basic pathophysiology as well as awareness of the appropriate diagnostic tests and therapeutic interventions. Because this knowledge base crosses many different disciplines, introduction to caring for the intensive care patient while exciting may also be intimidating. This textbook is designed toward making the dynamic environment of the critical care unit understandable and the approach to the patient both logical and successful. The book contains three components: 1 description of the procedural tasks commonly performed for the critically ill patient; 2 explanation of the most common pathophysiologic states encountered; and 3 description of specific disease entities with details of their differential diagnosis, diagnostic strategy and therapeutic plan. This book also uses several educational approaches that we have found useful in our own teaching sessions and prior textbooks. Clinical cases introduce chapters and highlight chapter segments to emphasize clinical relevancy. As an additional study aid, margin notes highlight important teaching points and facilitate easy review of chapter content. To consolidate the principles outlined in each chapter, review questions with full text explanations are provided at the end of each chapter. All these elements help reinforce the most important messages for the reader.

Wild Forests William S. Alverson, Don Waller, Walter Kuhlmann, 2013-03-05 Wild Forests presents a coherent review of the scientific and policy issues surrounding biological diversity in the context of contemporary public forest management. The authors examine past and current practices of forest management and provide a comprehensive overview of known and

suspected threats to diversity In addition to discussing general ecological principles the authors evaluate specific approaches to forest management that have been proposed to ameliorate diversity losses They present one such policy the Dominant Use Zoning Model incorporating an integrated network of Diversity Maintenance Areas and describe their attempts to persuade the U S Forest Service to adopt such a policy in Wisconsin Drawing on experience in the field in negotiations and in court the authors analyze the ways in which federal agencies are coping with the mandates of conservation biology and suggest reforms that could better address these important issues Throughout they argue that wild or unengineered conditions are those that are most likely to foster a return to the species richness that we once enjoyed *Resources in Education* ,1996

Biology Neil A. Campbell,Jane B. Reece,2005 Neil Campbell and Jane Reece s BIOLOGY remains unsurpassed as the most successful majors biology textbook in the world This text has invited more than 4 million students into the study of this dynamic and essential discipline The authors have restructured each chapter around a conceptual framework of five or six big ideas An Overview draws students in and sets the stage for the rest of the chapter each numbered Concept Head announces the beginning of a new concept and Concept Check questions at the end of each chapter encourage students to assess their mastery of a given concept New Inquiry Figures focus students on the experimental process and new Research Method Figures illustrate important techniques in biology Each chapter ends with a Scientific Inquiry Question that asks students to apply scientific investigation skills to the content of the chapter **Praeger Guide to the Psychology of Gender** Michele A. Paludi,2004-11-30 When we examine the field of gender psychology closely we note that much of what the popular media tells us about women and men does not hold up to research scrutiny This handbook helps to replace media stereotypes and myths with realities and shows us that there are more similarities between the sexes than differences The contributors to this handbook have a highly practical and readable approach that will prompt readers to examine their self awareness and social tolerance to biases against women and men in our social institutions such as schools and workplaces They also reveal that the increased participation in courses and reading of literature on gender has improved gender role attitudes and behavior causing both sexes to treat each other with more respect and dignity The contributors to this volume focus on gender role development and multicultural issues throughout the lifecycle They also emphasize the empowerment of both sexes The gender related topics in this handbook include Teacher socialization of girls and boys Women s and men s verbal and nonverbal communication skills Women s and men s voting patterns Sexual violence The gender wage gap Women s and men s friendships and sexual relationships Parents communication of masculinity and femininity to their children
