

Atlas of Prejudice: Mapping Stereotypes, Vol. 1

Sinopsis :

The Atlas of Prejudice is a continuation of the highly successful Mapping Stereotypes project by visual artist Yanko Tsvetkov. Started in January 2009, the project soon became a viral online sensation. It was gradually expanded to contain more than 40 stereotype maps, which the author describes as cartographic caricatures ridiculing the worst excesses of human bigotry and narrow-mindedness. The essays that accompany them narrate the story of the project and contemplate humanity's affair with prejudice since the dawn of civilization. They offer an even deeper but equally hilarious perspective on our inherent tendency to randomly blame people simply because someone convinced us that they ate our breakfast. According to this book, the first domesticated animal was not the dog, but the scapegoat. The razor-sharp irony of the author will guide you through the delusions of the ancient civilizations of Greece and China, reveal the stupefying amalgam of superstition and paranoia of the Middle Ages and it will leave you begging for more with a grotesquely hilarious prediction about the future of Europe. Satire and cartography rarely come in a single package but in the Atlas of Prejudice they successfully blend to produce a book that is shockingly funny and disturbingly thought-provoking all at the same time.

[Atlas of Prejudice](#) Yanko Tsvetkov, 2016-10-04 More than a hundred stereotype maps glazed with exquisite human prejudice especially collected for you by Yanko Tsvetkov, author of the viral Mapping Stereotypes project. Satire and cartography rarely come in a single package but in the Atlas of Prejudice they successfully blend in a work of art that is both funny and thought provoking. A reliable weapon against bigots of all kinds, it serves as an inexhaustible source of much needed argumentation and occasionally as a nice slab of paper that can be used to smack them across the face whenever reasoning becomes utterly impossible. This second edition packs the most extensive collection of Tsvetkov's maps to date in a single book suitable for all ages, genders, and races.

Mesopotamia in the Ancient World Robert Rollinger, Erik van Dongen, 2015-04-07 The Melammu Project, founded in 1998, organized five successive conferences and a sixth in 2008. Melammu Symposia 7 now represents a new dawn for the project, publishing the contributions of the meeting in Obergurgl in November 2013. This time it will not be an isolated event. Further conferences have already taken place and been planned: Kiel 2014, Helsinki and Tartu 2015, Kassel 2016, and Beirut 2017. The project board has been renewed, reinvigorated, and rejuvenated, and plans are underway for a thorough reworking and updating of the project database. Its focus now slightly reworded to be somewhat wider, is to investigate the continuity, transformation, and diffusion of Mesopotamian and Ancient Near Eastern culture from the third millennium BCE through the ancient world until Islamic times, quoted from the Melammu Project website. Of course, Mesopotamia was not the source of all culture, but it was an important area in ancient history that without doubt deserves such a project dedicated to the study of its cultural impact and heritage. This volume assembles 42 contributions devoted to the topics: Prayers and Incantations, Foreign Reception of Mesopotamian Objects, The Use of Literary Figures of Speech, Mesopotamia and the World, The World of Politics, Iran and Early Islam, and Representations of Power.

The psychological process of stereotyping: Content, forming, internalizing, mechanisms, effects, and interventions Baoshan Zhang, Magdalena Zawisza, Fangfang Wen, Junhua Dang, Fengqing Zhao, 2023-02-06 Stereotype is a pervasive and persistent human tendency that stems from a basic cognitive need to categorize simplify and process the complex world This tendency is a precondition for social bias prejudice and discrimination Previous research has mainly focused on the content psychological mechanisms and intervention strategies of negative stereotypes as well as the stereotype threat phenomenon induced by an evaluative context where a negative in group stereotype could be confirmed However there is a lack of research examining the psychological process of forming and internalizing social stereotypes the neurocognitive mechanisms of stereotypes and the interventions including potential neurocognitive interventions addressing the consequences of negative stereotypes Furthermore as per the Behavioral Immune System BIS theory the very presence of a pathogen is likely to increase stereotyping across various social categories especially in those with a heightened perception of vulnerability to disease Thus stereotypes can be enhanced in the context of pathogen exposure such as the current outbreak of COVID 19 pandemic People exposed to the virus are more likely to suffer from personal and institutional

stereotypes and discrimination which may cause negative consequences to personal and social well being Therefore in the current context of global Covid 19 pandemic it is necessary to investigate the increasing biases driven by stereotypes regarding viewing pathogens as a threat which holds across different social categories Specifically what constitutes and shapes stereotypes towards people living in epidemic areas What are the consequences of these short term shaped stereotypes What is the relationship between the consequences of these stereotypes and traditional stereotypes i e stereotypes towards race gender and age Will these short term stereotypes interact with traditional stereotypes to exacerbate discrimination or will the recategorization based on the short term stereotypes during Covid 19 pandemic allow people to ignore the traditional inferior social identity and in turn to promote social integration among different groups And how can we prevent the increasing tendency of relying on stereotypes and instead increase pro social behaviors in the Covid 19 context The current Research Topic focuses on understanding the psychological process of forming and internalizing social stereotypes the neurocognitive mechanisms of stereotypes as well as interventions including potential neurocognitive interventions regarding the consequences of negative stereotypes And we also aim to gather the latest research investigating the broad psychological process of social stereotyping with an emphasis on the implications under the Covid 19 context That is this Research Topic is also interested in the negative stereotypes specific to Covid 19 pandemic as well as relevant preventative interventions aimed at people perceived as at higher Covid 19 exposure risk Theoretical and empirical research from psychology sociology and related fields is welcome Examples of possible themes for manuscripts include but are not limited to the following topics The content of stereotypes Social categorization and discrimination based on stereotypes Traditional stereotypes and their consequences The psychological process of social stereotype formation and internalization The mechanisms including neurocognitive mechanisms of stereotypes and its consequences The stereotype neutralizing interventions including neurocognitive intervention strategies towards negative stereotypes The psychological process of stereotypes during Covid 19 pandemic The social group categorization and social cohesion during Covid 19 pandemic The interactions between traditional stereotypes towards social groups seen as inferior in the dominant culture and the short term stereotypes during Covid 19 pandemic The strategies of tackling stereotypes in Covid 19 pandemic
