Bayesian Argumentation The Practical Side Of Probability Synthese Library:

Bayesian Argumentation Frank Zenker, 2012-12-09 Relevant to and drawing from a range of disciplines the chapters in this collection show the diversity and applicability of research in Bayesian argumentation Together they form a challenge to philosophers versed in both the use and criticism of Bayesian models who have largely overlooked their potential in argumentation Selected from contributions to a multidisciplinary workshop on the topic held in Sweden in 2010 the authors count linguists and social psychologists among their number in addition to philosophers They analyze material that includes real life court cases experimental research results and the insights gained from computer models The volume provides for the first time a formal measure of subjective argument strength and argument force robust enough to allow advocates of opposing sides of an argument to agree on the relative strengths of their supporting reasoning With papers from leading figures such as Michael Oaksford and Ulrike Hahn the book comprises recent research conducted at the frontiers of Bayesian argumentation and provides a multitude of examples in which these formal tools can be applied to informal argument It signals new and impending developments in philosophy which has seen Bayesian models deployed in formal epistemology and philosophy of science but has yet to explore the full potential of Bayesian models as a framework in argumentation In doing so this revealing anthology looks destined to become a standard teaching text in years to come

The Epistemology of Group Disagreement Fernando Broncano-Berrocal, J. Adam Carter, 2020-11-23 This book brings together philosophers to investigate the nature and normativity of group disagreement Debates in the epistemology of disagreement have mainly been concerned with idealized cases of peer disagreement between individuals However most real life disagreements are complex and often take place within and between groups Ascribing views beliefs and judgments to groups is a common phenomenon that is well researched in the literature on the ontology and epistemology of groups The chapters in this volume seek to connect these literatures and to explore both intra and inter group disagreements They apply their discussions to a range of political religious social and scientific issues The Epistemology of Group Disagreement is an important resource for students and scholars working on social and applied epistemology disagreement and topics at the intersection of epistemology ethics and politics

Theory and Applications of Formal Argumentation Elizabeth Black, Sanjay Modgil, Nir Oren, 2018-03-05 This book constitutes the refereed proceedings of the 4th International Workshop on the Theory and Applications of Formal Argumentation TFAA 2017 held in Melbourne VIC Australia in August 2017 The workshop was co located with International Joint Conference on Artificial Intelligence IJCAI 2017 The 15 revised full papers presented were carefully reviewed and selected from 20 submissions The workshop covers the subjects such as non monotonic reasoning decision making inter agent communication the semantic web grid applications ontologies recommender systems machine learning neural networks trust computing normative systems social choice theory judgement aggregation and game theory and law and medicine

Social Virtue Epistemology Mark Alfano, Colin Klein, Jeroen de Ridder, 2022-07-29 This collection of 19

chapters all appearing in print here for the first time and written by an international team of established and emerging scholars explores the place of intellectual virtues and vices in a social world Relevant virtues include open mindedness curiosity intellectual courage diligence in inquiry and the like Relevant vices include dogmatism need for immediate certainty and gullibility and the like The chapters are divided into four key sections Foundational Issues Individual Virtues Collective Virtues and Methods and Measurements And the chapters explore the most salient questions in this areas of research including How are individual intellectual virtues and vices affected by their social contexts Does being in touch with other open minded people make us more open minded Conversely does connection to other dogmatic people make us more dogmatic Can groups possess virtues and vices distinct from those of their members For instance could a group of dogmatic individuals operate in an open minded way despite the vices of its members Each chapter receives commentary from two other authors in the volume and each original author then replies to these commentaries Together the authors form part of a collective conversation about how we can know about what we know In so doing they not only theorize but enact social virtue epistemology

Over,Ghanshyam Sharma,2023-04-29 This edited book examines conditionals from a number of interdisciplinary perspectives drawing on research from fields as diverse as linguistics psychology philosophy and logic Across 13 chapters the authors not only investigate and examine various commonly held perceptions about conditionals but they also challenge many of the assumptions underpinning current conditionals scholarship setting an agenda for future research Based in part on the papers presented at a unique international summer school Conditionals in Paris this volume represents the cutting edge in the study of conditionals and it will be of interest to scholars in fields including linguistics and psychology semiotics philosophy and logic and artificial intelligence

Theory of Legal Evidence - Evidence in Legal Theory Verena Klappstein,Maciej Dybowski,2022-01-03 This book addresses theoretical problems concerning legal evidence The concept of evidence is expected to fulfill a number of distinct roles in science and philosophy but also in legal theory and law some of which are complementary while others are conflicting In their profession lawyers have to deal with evidence and proof Yet the legal concept of evidence is constantly changing and the debate concerning the distinction between a legal concept of evidence the ordinary concept of evidence and the concept of evidence in science is far from being settled What is more the problem of evidence is central to both epistemology and the philosophy of science and by extension to our academic thinking on law In short legal theorists interest in evidence may include such diverse objects as a bloody knife sensory data linguistic entities or psychologically recognized beliefs The book surveys selected theoretical roles that the concept of evidence plays and explores their relations and interconnections The content is divided into three parts investigating 1 evidence in epistemology and the philosophy of science which focuses on evidence methodologies and the problem of proof in legal scholarship 2 evidence in legal theory and legal philosophy where particular attention is paid to the interplay between evidence legal reasoning and the binding force of such reasoning and 3 evidence in

law where theoretical problems pertaining to witnesses expert opinions explanations of the accused statistical evidence and neuroscientific evidence are examined The Psychology of Micro-Targeted Election Campaigns Jens Koed

Madsen,2019-09-26 This book examines the psychology behind micro targeted tactics used in election campaigning and the advent of increasingly sophisticated dynamic Agent Based Models ABMs It discusses individual profiling how data and modelling are deployed to enhance the effectiveness of persuasion and mobilization efforts in campaigns and the potential limitations of these approaches Madsen particularly explores how psychological insight and personal data are used to generate individualised models of voters and how these in turn are applied to optimise persuasion strategies tailored to a specific person Finally the book considers the broader democratic dilemmas raised by the introduction of these tactics into politics and the critical civic importance of understanding how these campaigns function This timely work offers fresh insights for students and scholars of political psychology philosophy political marketing media and communications

Epistemic Defeat Jan Constantin,2021-06-21 A number of well developed theories shed light on the question under what circumstances our beliefs enjoy epistemic justification Yet comparatively little is known about epistemic defeat when new information causes the loss of epistemic justification This book proposes and defends a detailed account of epistemic defeaters The main kinds of defeaters are analyzed in detail and integrated into a general framework that aims to explain how beliefs lose justification It is argued that defeaters introduce incompatibilities into a noetic system and thereby prompt a structured re evaluation process that makes a justified reinstatement of the defeated belief impossible The account is then applied to the topic of disagreement where it is used in an argument for conciliationism as well as a new explanation for higher order defeat Throughout the book the notion of defeat is the center of attention while a number of new issues are discussed at the intersections of defeat and justification Specifically new problems are raised for broadly internalist accounts of defeat a fully descriptive reliabilist account of defeat is provided and the case for normative defeat is revisited

Computational Models of Argument Chris Reed,Matthias Thimm,Tjitze Rienstra,2024-09-15 This book presents the proceedings of COMMA 2024 the 10th biennial International Conference on Computational Models of Argument held from 18 to 20 September 2024 in Hagen Germany The COMMA conference series provides a dedicated forum for the presentation and discussion of the latest advancements in this interdisciplinary field covering basic research systems and innovative applications and nurturing the steady growth of interest in computational argumentation research worldwide A total of 63 submissions was received for the conference and after a thorough review process 26 were accepted as full papers with a further 12 accepted as demos accompanied by an extended abstract and 2 as full papers with accompanying demo resulting in an acceptance rate of 53% for full papers and 63% for papers and demo abstracts combined In addition to these 40 papers extended abstracts of the 3 invited talks are also included here Semantics in Argumentation Classifications and Challenges by Leila Amgoud Expanding the Scope of Bayesian Argumentation by Ulrike Hahn and The Long Road to Trustworthy Natural

Language Argumentation by Serena Villata The book provides a fascinating overview of current research and innovations and will be of interest to all those working in the field Evaluating the Language of Argument Martin Hinton, 2020-11-30 This book is concerned with the evaluation of natural argumentative discourse and in particular with the language in which arguments are expressed It introduces a systematic procedure for the analysis and assessment of arguments which is designed to be a practical tool and may be considered a pseudo algorithm for argument evaluation The first half of the book lays the theoretical groundwork with a thorough examination of both the nature of language and the nature of argument This leads to a definition of argumentation as reasoning expressed within a procedure which itself yields the three frames of analysis used in the evaluation procedure Process Reasoning and Expression The second half begins with a detailed discussion of the concept of fallacy with particular attention on fallacies of language their origin and their effects A new way of looking at fallacies emerges from these chapters and it is that conception together with the understanding of the nature of argumentation described in earlier sections which ultimately provides the support for the Comprehensive Assessment Procedure for Natural Argumentation The first two levels of this innovative procedure are outlined while the third that dealing with language and involving the development of an Informal Argument Semantics is fully described The use of the system and its power of analysis are illustrated through the evaluation of a variety of examples of argumentative texts
